Battery type

High quality workmanship

The **14.4V 2600mAh battery** is designed with durability in mind, ensuring long-lasting performance and reliable operation. The use of **Li-ion** technology makes the battery safe and efficient for a long time. The **iRobot Roomba battery** ensures high quality and safe use.

Safety and reliability

The modern Battery Management System (BMS) protects the device against overheating, overloading, and short-circuiting.

A few reasons to replace the battery

Greater efficiency - The new battery restores the vacuum cleaner's full power for better cleaning quality.

More run time - With the new battery, your vacuum cleaner will run longer on a single charge, making it more comfortable to use.

Better stability - A worn-out battery can lead to overheating problems, the new battery ensures stable operation.

Easy replacement - Replacing the battery is quick and easy, so you can quickly restore your vacuum cleaner to full performance.
