Full product description

Sensibo Pure Filter - HEPA filter for Sensibo Pure air purifier

Sensibo Pure Filter is a filter that provides effective and efficient indoor air filtration. Thanks to it, you can breathe clean and healthy air, free from pollutants, allergens and unpleasant odors.

Three layers of protection

The **Sensibo Pure Filter** consists of **three layers** that provide optimal protection against different types of particles. The **first layer is a pre-filter** that traps larger contaminants such as hair, pet hair and dust. **The second layer is a carbon filter**, which removes odors, smoke, volatile organic compounds and other chemicals from the air. **The third layer is a HEPA filter**, which eliminates fine particles down to 0.1 micrometers in size, such as viruses, bacteria, mold, pollen and exhaust fumes.

Easy replacement and maintenance

Sensibo Pure Filter is easy to replace and maintain. **It is recommended to replace it every 6 months** under typical conditions and use. The Sensibo Pure air purifier automatically alerts you when it's time to change the filter via a mobile app or voice assistant.

Compatibility and availability

The Sensibo Pure Filter is compatible with the Sensibo Pure air purifier, which is a smart device controlled by WiFi. This filter measures 170 x 170 x 230 mm and weighs 1.94 kg.
