Full product description

SHARON OUTDOOR FTTX CLOSURE 2 TRAYS 24 CORE

The fiber optic splicing case can be used in outdoor, underground, overhead, pedestal and direct buried installations. The device allows direct splicing and bifurcation splicing. It also protects fiber optic splices from the elements while providing quick and easy, cost-free re-access.

Properties

- Can be used in straight-through and stub application for bundle fiber and ribbon fiber cables
- Suitable for antenna wall channel or buried application.
- Mechanical seal and convenient to reopen
- Excellent performance in sealing
