Full product description

In-depth analysis, powerful purification with Xiaomi SmartMi Air Purifier P1

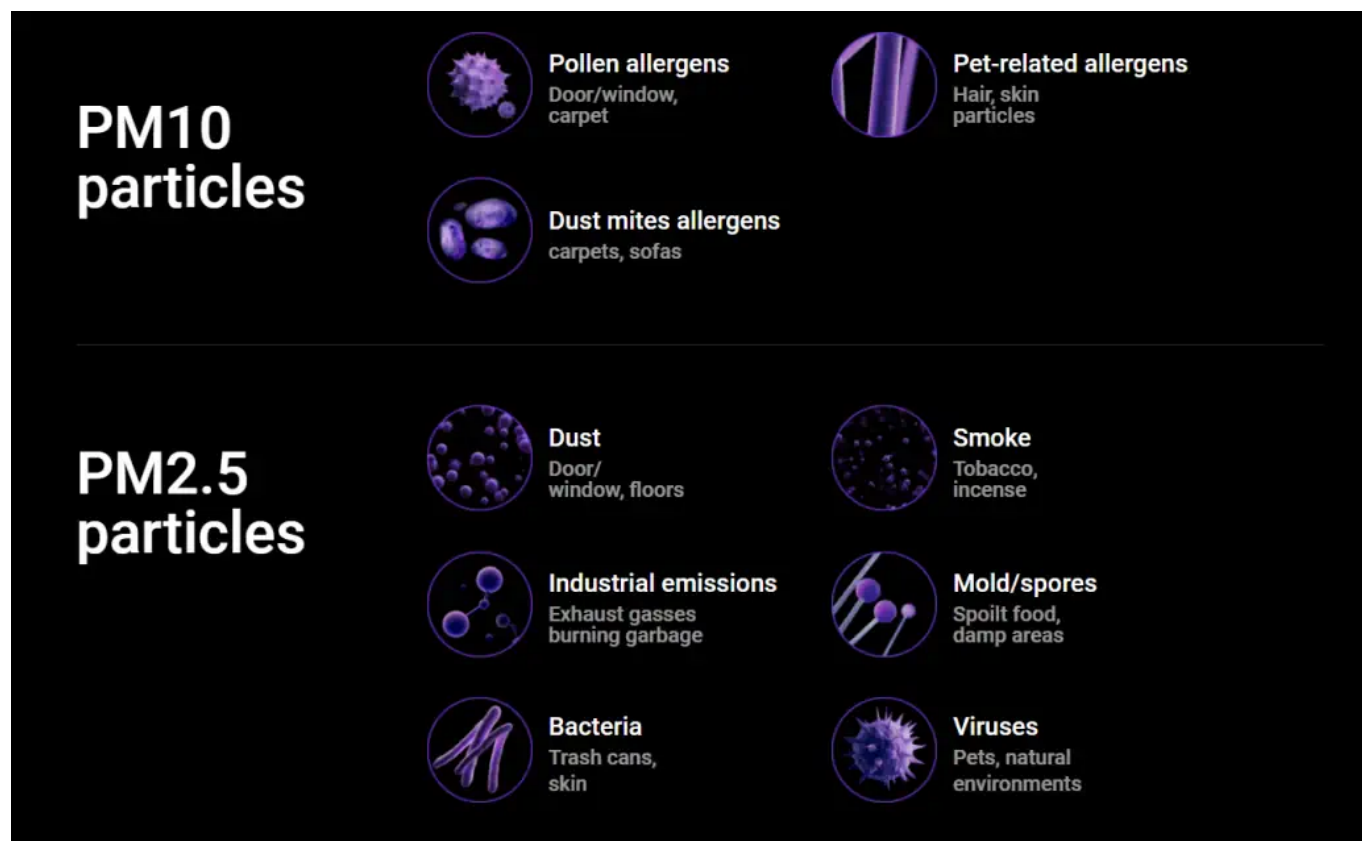

The intelligent combination of environmental analysis and air purification

Xiaomi SmartMi Air Purifier P1 has a dual function laser sensor that monitors indoor air quality and reads polluted indoor air. The dual-function **PM2.5/PM10** laser **sensor** accurately analyzes the air quality, providing automatic optimization of the filtration rate.

High cleaning efficiency thanks to a genuine HEPA filter

The high-quality filtering materials in the **Xiaomi SmartMi Air Purifier P1** quickly and easily purify indoor air. With innovative filter materials, SmartMi Air Purifier P1 will remove **99.9% of smoke** in just 1 hour, and remove up to **99.98% of PM10** (pollen allergens, dust mites, pet allergens) and **PM2.5** (dust, industrial emissions, bacteria and viruses, smoke, mold/spores) **particles** in an area of up to 80 square meters.

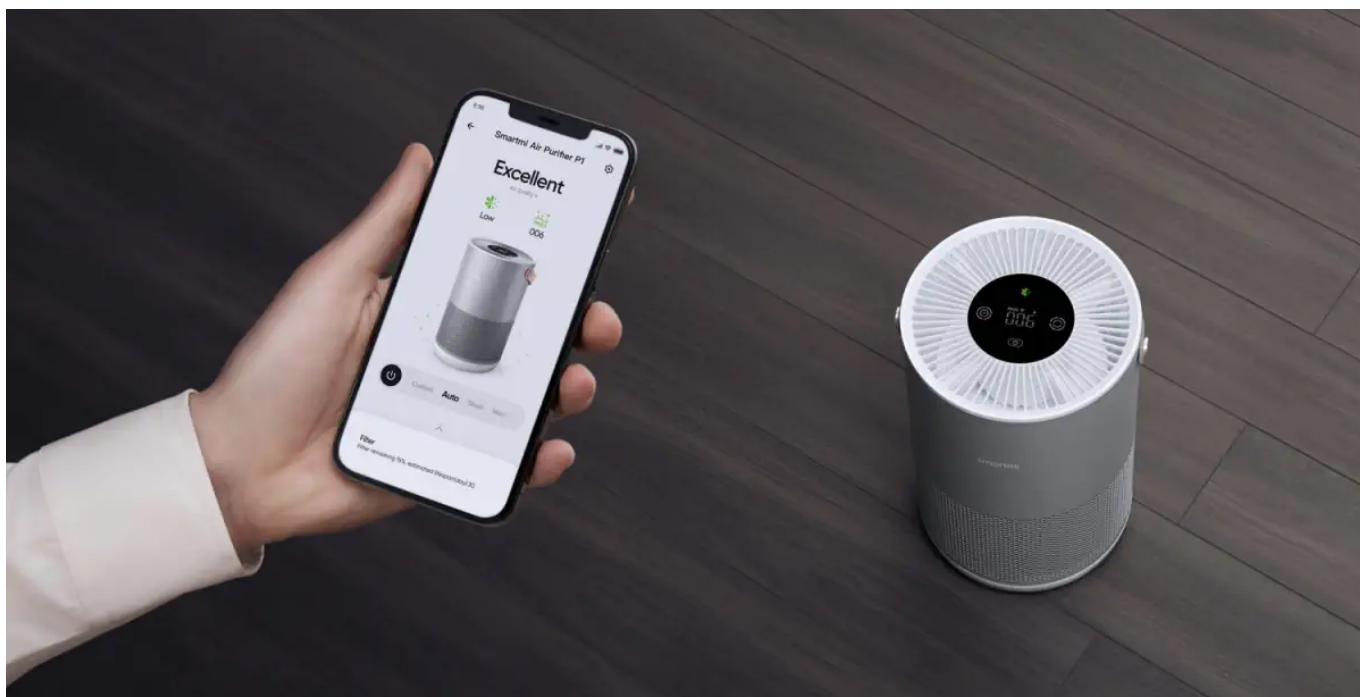

Small, light, even more powerful

The **Xiaomi SmartMi Air Purifier P1**, about the size of a flower pot, quickly purifies an area of up to 100 cubic meters in 1 hour. A 60 square meter apartment can be cleaned by **Smartmi Air Purifier P1 in just 30 minutes**. The 360° cyclic cleaning function makes getting rid of dust in your apartment even more efficient.

Intelligent technology for the home

The air purifier will prepare your home for your arrival! Remote control via the **Mi-Home app** allows you to control the **Xiaomi SmartMi Air Purifier P1** when you are away from home. "Green" technology is now close to you! You can connect the Xiaomi SmartMi Air Purifier P1 to your smart home management system and control it with **Google Assistant, Amazon Alexa, Apple HomeKit**.

Main features

- 4160 litres of cleaned air per minute
- Filter life of 6-12 months
- Removes up to 99.9% of smoke within 1 hour
- Detection of particulate matter - PM10 and PM2.5
