Full product description

Xiaomi SmartMi Pure Evaporative - air humidifier

Xiaomi SmartMi Pure Evaporative is a mobile air humidifier. Its capacity is **240 ml/h** and the **water tank capacity is 4 l**, so after one filling the device can operate at the highest intensity **for 16.5 hours**.

Adjusting the moisture level

The air is humidified by rotating discs, **which do not wear out**, which has a positive impact on the operating costs of the humidifier. The user can choose the level of humidification and Xiaomi SmartMi Pure Evaporative will strive to maintain it.

Quiet operation of the Xiaomi air humidifier

The humidifier works quietly, as its maximum **noise level is 45 dB**. It is distinguished by a very good price/quality ratio.

Main features:

- 2 sensors: humidity and temperature
- Automatic water evaporation: no odours
- 3 speed modes
- Water level indicator
- Timer: timer
- Wi-Fi function: control by mobile device (Android, ios)
- Adjusting the indicator: adjusting the brightness level

Precise operation of the humidifier - Xiaomi Smartmi Pure Evaporative

The Xiaomi Smartmi Pure Evaporative 4L has **2 sensors** that allow for precise automatic operation. Humidity will always be at the level we choose, and the intelligent humidifier will not make the room excessively humid. If the humidity level reaches 70%, the humidifier switches off and prevents the formation of fungi or mould. Possibility to **control the humidifier with the mobile application**. Any device with Android or iOS installed is enough to control the humidifier.
