Information:

The Extralink 1U Black Shelf is a robust accessory for 10" rack cabinets, made from cold-rolled steel, ensuring stability and a long lifespan. Its design features ventilation holes that allow for optimal airflow, reducing the risk of overheating and improving the performance of installed devices, while also enhancing the safety of the installation. The shelf is versatile and suitable for various environments, from server rooms to home server setups, as well as in the telecommunications and energy sectors. The package includes M6 screws for easy installation, saving time and increasing user comfort. With its standard 1U size, the shelf maximises space utilisation, facilitating the organisation of equipment in any installation.

Full product description

Extralink shelf 1U Black - a robust accessory for 10" cabinets.

Extralink 1U shelf is a practical **fixed shelf** designed for installation in 10" racks. Its cold-rolled steel construction **ensures its stability** and **long life** even with daily use. The shelf works well as an accessory supporting the mounting of equipment in **rack enclosures**, making it a useful solution for both office and professional installations.

Effective equipment cooling

The Extralink 1U 10-inch Black shelf has been designed with a system of **vents** that ensure optimal airflow in the cabinet. This reduces the risk of overheating, which prolongs the life and stability of the installed equipment. This design improves performance, **reduces power consumption** and increases the safety of the entire 10" rack installation.

Universal application in any industry

The shelf will prove useful in a wide range of environments - from professional server rooms and offices, to warehouses and home server rooms. Its functionality will also be appreciated by installers working in **teletechnology and power engineering**, where stable mounting of equipment is crucial. It is a practical accessory dedicated to organizing infrastructure in places that have different **rack enclosures**.

Ready-made installation kit

The **Extralink 1U 10-inch Black shelf** comes with a set of **M6** screws, which allow quick and hassle-free installation in the rack. Thus, the user does not have to worry about additional accessories - everything needed for installation is included in the box. This practical solution saves time and provides convenience during system setup.

Optimum use of space

Extralink 1U Black shelf has been designed according to the 10" rack standard, so it easily fits **into 10 "** racks . Its 1U size allows you to make maximum use of space without taking up extra space in the structure. This makes it a practical accessory that facilitates the organization of equipment in any installation
