Information:

Extralink Home Air Fryer SJ-400 is a practical air fryer with a 4 l capacity and 1300 W power, ideal for everyday preparation of fries, vegetables, meat, fish and snacks. It uses hot air circulation, which helps reduce the amount of oil and achieve crispy, evenly cooked dishes. The 80-200°C temperature range and 8 programmes make it easy to adjust the settings for different meals, while the touch panel with digital display and timer ensures simple operation. The removable basket makes cleaning easier, and the lack of Wi-Fi means convenient control without an app.

Product features

Product type	Hot air fryer
Handle(s)	Yes
Package weight	4000 g
Dishwasher-proof parts	Yes
Material	Metal
Dishwasher proof	Yes
Package depth	295 mm
Package height	295 mm
Package width	335 mm
Easy to clean	Yes
Removable crumb tray	Yes
Digital timer	Yes
Temperature (min)	80 °C
Easy disassembly	Yes

Illuminated on/off switch	Yes
On/off switch	Yes
Frying function	Yes
Control type	Touch
AC input frequency	50 Hz
AC input voltage	220 V
Temperature (max)	200 °C
Removable bowl	Yes
Product colour	Black
Construction type	Single
Auto power off	Yes
Power	1300 W
Fryer food capacity	3.2 kg
Built-in display	Yes
Baking function	Yes

Full product description

Extralink Home Air Fryer SJ-400 - convenient preparation of everyday meals

Extralink Home Air Fryer SJ-400 is an air fryer that uses hot air to prepare a variety of dishes. The appliance allows you to bake and roast food using a limited amount of oil, so it can replace several traditional food preparation methods. It is suitable for making chips, vegetables, meat, fish, snacks and selected baked goods.

Extralink Smart Life Air Fryer SJ-400 4L EU

4-litre capacity for home meals

The 4-litre basket offers enough space to prepare portions for several people. It can hold chips and vegetables as well as larger pieces of meat or other dinner ingredients. This capacity helps reduce the need to divide food into many small batches, while still keeping the appliance compact enough for a home kitchen.

1300 W power supporting efficient food preparation

The 1300 W output helps heat the chamber and maintain the temperature selected for the dish being prepared. The appliance uses intensive hot-air circulation, so heat reaches the food in the basket. This makes it possible to prepare snacks, side dishes or full meals without having to switch on a large oven.

Fast cooking with our air fryer

**Adjustable temp.
80°C – 200°C**

The higher temperature range allows cooking to finish **20%** faster than with conventional fryers.

No need to wait long for tasty treats.

Cooking with hot air

The Air Fryer SJ-400 prepares food by circulating heated air around the ingredients. This method makes it possible to reduce the amount of oil compared with traditional deep frying. The hot air helps create a browned surface on dishes, and the appropriately selected time and temperature help preserve the desired texture inside.

Convenient cleaning with removable parts that can be washed in the dishwasher or by hand, for complete convenience and time savings!

Temperature adjustment from 80 to 200°C

The temperature range from 80 to 200°C allows the settings to be matched to different foods and preparation methods. Lower values can be used for gentle reheating or processing that requires milder conditions, while higher values help to crisp chips, meat and other dishes. The ability to choose the temperature yourself offers greater control over the whole process.

Even Cooking:

This technology ensures even distribution of hot air around the food, allowing for uniform cooking and crispiness on every side.

Better Frying Results:

Thanks to the air circulation around the food, it is cooked evenly, minimizing the need to turn it during cooking.

Faster Cooking:

More effective air circulation can shorten cooking time compared to traditional methods, which also helps save energy.

Healthier Meals:

Even frying without the need to use large amounts of oil allows you to prepare healthier dishes with lower fat content.

Touch panel with digital display

The touch panel located on the upper part of the housing allows you to select a programme and set the time and temperature. The digital display presents the operating parameters clearly, so you can quickly check the current settings. Control is carried out directly on the appliance and does not require installing an app or connecting the air fryer to a home network.

Eight programmes to make choosing settings easier

The eight available programmes help you select operating parameters for popular categories of dishes. The preset modes reduce the number of steps needed before starting meal preparation, which is especially useful for everyday use. The user can use an automatic programme or adjust the temperature and time themselves according to the ingredients and their own preferences.

Less fat, more health

Reduce the amount of fat
you consume by up to **90%**
while preserving the excellent
taste of your meals

Digital timer for easier time control

The built-in timer allows you to set the operating time according to the dish being prepared. The timer helps you monitor the process without constantly checking the clock, and the information visible on the display lets you track the selected settings. This function is useful when preparing several parts of a meal at the same time and when using preset programmes.

4L AIR FRYER

Ideal for a delicious meal
for up to 4 people!

Removable bowl and easier cleaning

The removable bowl makes it easy to take out the prepared food and reach the parts that need washing. The appliance has been designed for easy disassembly, which helps remove food residue after use. Regular cleaning of the basket and bowl helps maintain hygiene and reduces the mixing of aromas from dishes prepared one after another.

Variety of dishes

Standalone operation without an app or Wi-Fi connection

The Extralink Home Air Fryer SJ-400 model in this version does not use Wi-Fi connectivity, so all functions are available directly from the touch panel. The appliance can be used without creating an account, pairing with a smartphone or configuring a network. The black housing, pull-out bowl handle and top-mounted panel create a functional design intended for everyday meal preparation.

**Energy-efficient cooking
thanks to fast heating and
efficient air circulation –
LESS ENERGY, MORE FLAVOR!**
