Full product description

Non-contact measurement

Infrared thermometers allow temperature measurement **without direct contact** with the body. This works by collecting infrared radiation emitted by the body or object

Multifunctional infrared thermometer

Measures body temperature
from **32°C to 49,5°**

Measures
object temperatures
from **0°C to 100°**

**Its measuring accuracy is $\pm 0.2^{\circ}\text{C}$,
which ensures reliable results**

Fast and precise measurements

The measurement is **fast and efficient**, making it a **convenient way** to get temperature information in a short period of time. This is especially useful for **young children** or people reluctant to take traditional measurements. Infrared thermometers are characterized by high precision measurements.

Measurement in 1 second

The digital thermometer provides an instant measurement time of just 1 second. This allows users to quickly and conveniently check the temperature of the body or objects without unnecessary waiting.

Easy to use

Simply point the thermometer in the direction of the measurement, press the button, and the result will appear on the display. **The non-contact nature of** measurement with infrared thermometers reduces the risk of cross-infection. In addition, most are **easy to clean**, which contributes to hygiene.

Versatility of Application

These thermometers can be used to measure the temperature of the body, but also of various surfaces, such as **liquids, food or objects**, making them a versatile tool in a variety of situations.

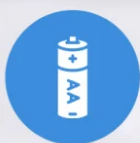

1 second measurement

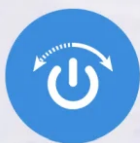

LCD display with
backlight

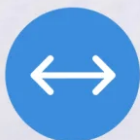

Low battery sensor

Power supply 2xAA

Automatic switch off after
15 seconds

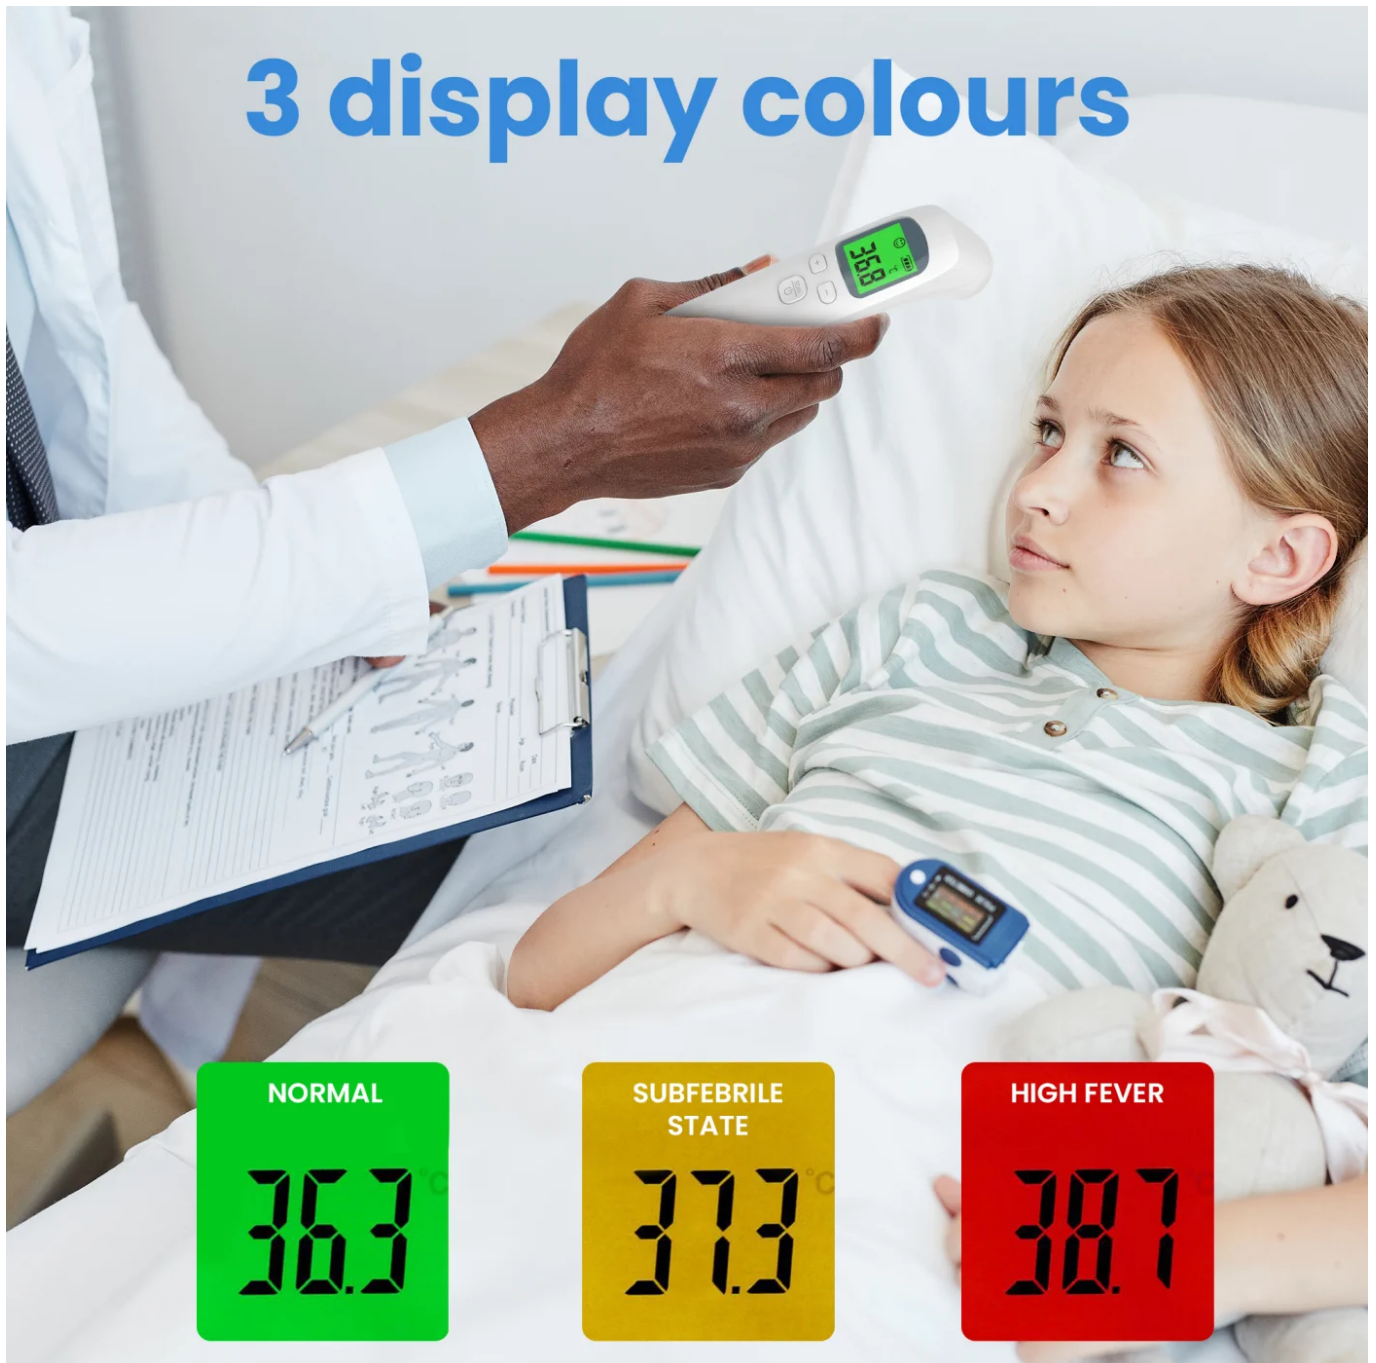

Measuring distance
from 3cm to 5cm

EXTRALINK THERMOMETER

3 display colours

NORMAL

36.3°C

**SUBFEBRILE
STATE**

37.3°C

HIGH FEVER

38.7°C

Switching between °C/°F

The thermometer allows users to easily switch between the Celsius and Fahrenheit temperature scales, enabling the device to be used according to the user's preference.
