Full product description

Teltonika Eye Beacon ATEX BTSID1: Reliable Monitoring of Resources in Hazardous Environments.

The **Teltonika Eye Beacon ATEX BTSID1** is a state-of-the-art **Bluetooth Low Energy (BLE) IDbeacon** specifically designed for asset monitoring in hazardous environments. With its smart design, rugged housing and long battery life, it offers a reliable and durable solution for your business.

ATEX Certification: Safety in Any Environment

The **ATEX-certified EYE Beacon** is designed to work in the most demanding and hazardous environments, such as the oil, gas and chemical industries. Its rugged, waterproof housing provides protection against extreme conditions, making it ideal for **use in harsh environments**.

Innovative Wireless Solutions

Teltonika's wireless solutions open new horizons for your business by helping you monitor assets in real time. **Eye Beacon ATEX** is designed for easy and quick setup and integration, saving time and resources. With full compatibility with Teltonika's firmware platform, the device offers enhanced functionality and ease of use.

Applications in Various Industries

Teltonika Eye Beacon BTSID1 is a versatile tool ideal for a variety of applications. It will prove useful in traceability, **delivery tracking and monitoring of moving objects in logistics, agriculture and construction**. The beacon is also indispensable in indoor tracking solutions such as warehouses, hospitals and transportation hubs.

Support for iBeacon and Eddystone Protocols

EYE Beacon supports iBeacon and Eddystone protocols, allowing for extensive integration with a variety of monitoring systems. Teltonika's dedicated **EYE APP** mobile app enables quick configuration, data scanning and debugging anytime, anywhere, available for both Android and iOS.

Locating Resources in a Hazardous Environment

With **Eye Beacon ATEX**, you will always know where your assets are. The device provides reliable monitoring of objects such as trailers, containers, tractor attachments, and tools and inventory, even in the most demanding industrial environments.
