Full product description

Teltonika Eye Sensor ATEX BTSMP1: The Ideal Solution for Monitoring in Harsh Environments

The **Teltonika Eye Sensor ATEX BTSMP1** is an advanced **BLE sensor** specifically designed to track temperature, humidity, motion and magnet detection in hazardous environments. With **ATEX** certification, the device is ideal for applications in the oil, gas and chemical industries where safety and precision are critical.

Innovative Wireless Solutions

Wireless solutions from Teltonika open up new horizons for your business, enabling you to effectively monitor your assets. **The Teltonika Eye Sensor BTSMP1** is a state-of-the-art **Bluetooth Low Energy beacon** with a rugged, waterproof housing and long-lasting battery. Its design allows for low-cost, quick and easy setup and integration, significantly saving time and resources while increasing accountability and process control.

Versatile Applications in Logistics, Agriculture and Construction

The Teltonika Eye Sensor BTSMP1 is ideal for traceability, **delivery tracking** and monitoring of moving objects in various industries **such as logistics (trailers, containers), agriculture (tractor attachments) and construction (tools and inventory)**. With sensor data, the device also works well for cold-chain refrigerators.

Advanced Detection Features

The **Teltonika Eye Sensor BTSMP1**'s built-in accelerometer allows it to detect movements and falling objects. The magnet detection function enables wireless monitoring of door opening and closing, and notifications of events such as the opening of a trailer door. The device supports **iBeacon and Eddystone** protocols for **versatility and compatibility**.

Full Compatibility with Teltonika Platform

The Teltonika Eye Sensor BTSMP1 is fully compatible with **Teltonika's firmware platform**, providing expanded functionality and flexibility. Configuration, scanning and upgrades can be performed anytime, anywhere using Teltonika's dedicated mobile app.
