Plug and Play	Yes
Built-in memory	No
Product colour	Black
Built-in display	No
Designation	Car
Product weight	55 g

Full product description

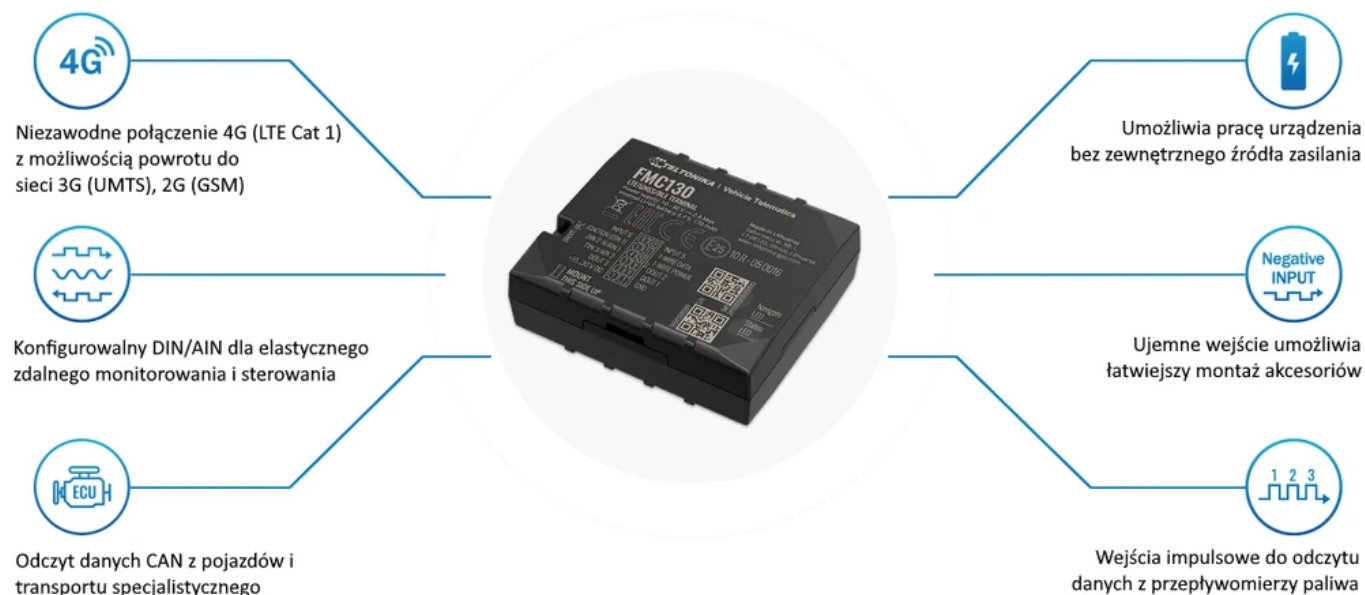

Teltonika FMC130 Car GPS Tracker with 4G and backup battery

Teltonika FMC130 - this tracker is a compact, professional tracking terminal that provides real-time monitoring capabilities. This model is also equipped with a **backup battery** that ensures long-term autonomous operation of the device. Based on the Teltonika FMB platform, the tracker retains all the features of the old model and extends them with the **most advanced technologies**.

Effective and accurate positioning

The GPS tracker has built-in **GNSS/Bluetooth and 4G** modules, with 3G (UMTS) and 2G (GSM) network redundancy. This model is ideal for installation when it is important to accurately and quickly determine the location of various vehicles. It can be effectively used for **fleet management**, taxi services, car rental, public transport traffic control, as a **means of protecting personal vehicles**, etc.

Extensive functionality of use

Programmable inputs, various configurable scenarios for digital outputs (buzzer, immobiliser, door lock, indicator lights, etc.) together with **4G support**, make this device one of the most functional and flexible in the world.
