Full product description

Teltonika GH5200 - Tracking device for people working in seclusion

The **Teltonika GH5200** is an **autonomous** personal tracking device with **GNSS**, **GSM** and **Bluetooth** connectivity. Designed to protect people working without close or direct supervision of other people: for example, health care users, maintenance workers, self-employed people or workers working outside standard working hours. The device has programmable buttons, a **1050mAh battery**, and the possibility of high quality **voice communication**, which ensures safety and protection.

Management

- Intelligent configurator
- Updates in the cloud
- Friendly user interface

Design

- Slim case
- 5 configurable buttons
- Can be worn around the neck or on a belt

Telemetry

- Rapid acquisition of location
- Input/output element statuses
- Alert events
