Full product description

Teltonika RUT241 Industrial Router

The **Teltonika RUT241** is a modified version of the bestseller **RUT240** that inherits its best features, including industrial design, compact size, multiple connectivity interfaces and RMS compatibility. The RUT241 is a small, cost-effective and powerful industrial LTE router for professional applications. The router provides high performance in LTE communication. It features a SIM card slot and connection status LEDs. External antenna connectors allow you to use higher gain antennas to increase LTE signal strength and easily find the best signal location.

4G LTE wireless network and Wi-Fi

Equipped with **4G LTE connectivity, Wi-Fi, and two Ethernet ports**, the router provides uninterrupted connectivity with backup through automatic failover.

Multiple automation scenarios

Digital inputs and outputs combined with advanced **RutOS** software enable solution automation scenarios.

The perfect choice for many solutions

The Teltonika RUT241 is ideal for a variety of **IoT and M2M solutions** that require easy configuration, reliable networking and remote availability.

The standard set includes

- RUT241 router
- 9 W power supply
- 2 x LTE antennas (SMA male)
- 1 x WiFi antenna (RP-SMA male)
- Ethernet cable (1.5 m)
- SIM adapter
- Quick reference guide
- RMS flyer
- Packaging

ROUTER RUT241

9 W PSU

2 X LTE ANTENNAS (SWIVEL, SMA MALE)

1 X WIFI ANTENNA (SWIVEL, RP-SMA MALE)

ETHERNET CABLE (1.5 M)

SIM ADAPTER KIT
