Price: **809.00 zł** gross / 657.72 zł net

Manufacturer: TELTONIKA

Referention number: DNXXGGHIJMRMMGO

Product features

Height	30 mm
Width	100 mm
Depth	85 mm
Power consumption (typical)	10.5 W
RAM capacity	0.128 GB
Processor frequency	0.65 GHz
SIM interface	1.8 V
Product weight	247 g

Full product description

Teltonika RUT360

The **RUT360** is an upgraded version of the bestselling **RUT240**. This compact industrial router offers cellular, Wi-Fi and wired Internet connectivity. The RUT360 features **dual Ethernet interfaces, WiFi 802.11 b/g/n and a 4G LTE Cat 6 cellular module** offering data rates **up to 300 Mbps**.

Unique programming, remote monitoring and security features make **the RUT360** ideal for **IoT and M2M applications** where secure and reliable connectivity is a must. Carrier aggregation functionality makes this compact device indispensable in areas or applications where cellular data speeds are limited.

Wireless network

With built-in **WiFi** connectivity, you can take advantage of **LTE** with Wi-Fi operating at **2.4GHz**.

External SIM card slot

SIM card slot allows you to easily install a SIM card in the router. After mounting the SIM card, the device will connect to the network and the device will not have to restart. Configuration of LTE connection is limited to entering APN name and PIN number of SIM card.

Two Ethernet ports

This small and compact device has **two 10/100Mbps ports**. The ports can be used as main internet connection or backup connection.

Teltonika RMS

Teltonika Networks' **Remote Management System (RMS)** gives you control over your connected solution and consists of three main parts:

- **RMS MANAGEMENT** - gives you full control over your fleet of Teltonika Networks routers and gateways, ensuring their security and availability.
- **RMS CONNECT** - allows you to remotely access and control other smart devices, even without a public IP.
- **RMS API** - helps you take what you need from RMS and deploy it to the IoT platform of your choice.

 ROUTER RUT360	 18 W PSU	 2 X LTE ANTENNAS (SWIVEL, SMA MALE)
 2 X WIFI ANTENNA (SWIVEL, RP-SMA MALE)	 ETHERNET CABLE (1.5 M)	 SIM ADAPTER KIT
