Full product description

Teltonika RUT361 - an industrial 4G LTE router that combines performance with reliability

With advanced **LTE Cat6** and **WiFi 4** technology , it offers fast and stable network connections, **ideal for industrial applications**. Reliability and robust design make it an excellent choice for demanding environments.

Powerful LTE connectivity

The Teltonika RUT361 is equipped with an [LTE Cat 6](#) modem that enables high-speed data transfer of up to 300 Mbps in download and 50 Mbps in upload. This allows **you to enjoy a fast and stable internet connection**, regardless of your location. Ideal for applications where traditional connections are unavailable or insufficiently efficient.

Advanced WiFi and security features

The Teltonika RUT361 router offers **dual-band WiFi 4**, which provides a stable wireless connection throughout the work area. Support for security standards such as WPA3, AES-CCMP, and TKIP guarantees **the highest level of data protection**. This ensures that your network is always secure and protected from unauthorized access.

Compact and durable design

Compact industrial router, **meets the IP30 standard** its housing made of aluminum. It is suitable for extreme conditions, with a temperature range of -40 to 75 degrees Celsius. In addition, with support for **DIN-rail mounting**, the router is easy to install in various industrial environments.
