Full product description

Industrial-grade switch from Teltonika Networks

The **TSW210** is an industrial-grade switch from **Teltonika Networks** with eight Gigabit Ethernet ports and two SFP ports.

Key features of the TSW210

- Wide range of supported supply voltages
- 2 SFP ports for long-range fiber optic communications
- 2-pin industrial DC power socket
- DIN rail and surface mountable
- Durable aluminum housing for industrial applications
- 8 Gigabit Ethernet ports with speeds up to 1000 Mbps

Network interfaces

The **Teltonika TSW210 switch** features **2 SFP ports** for long-range fiber optic communication and **8 Gigabit Ethernet ports** with download/upload speeds of up to 1000 Mbps.

Created for industrial applications

The **TSW210's durable, heavy-duty aluminum housing** with DIN rail and surface mount capabilities makes it **ideal for industrial applications**.

Industrial power socket

The **Teltonika TSW210 switch** has a 2-pin industrial DC power socket with an input voltage range of 7-57 VDC.

Ideal solution for photovoltaic installations

- Designed to operate even in extreme temperatures and adverse conditions, the TSW210 feels right at home in biomes best suited for photovoltaic farms.
- 2 SFP ports for long-range fiber communication and 8 Gigabit Ethernet ports make the TSW210 an ideal choice for long-distance

networking without compromising reliability and latency.

- Compact size, DIN rail and other surface mounting options, and a 2-pin industrial DC power connector with an input voltage range of 7-57 VDC make this unmanaged switch easily adaptable to the complex mechanical configuration of a photovoltaic farm.
