Full product description

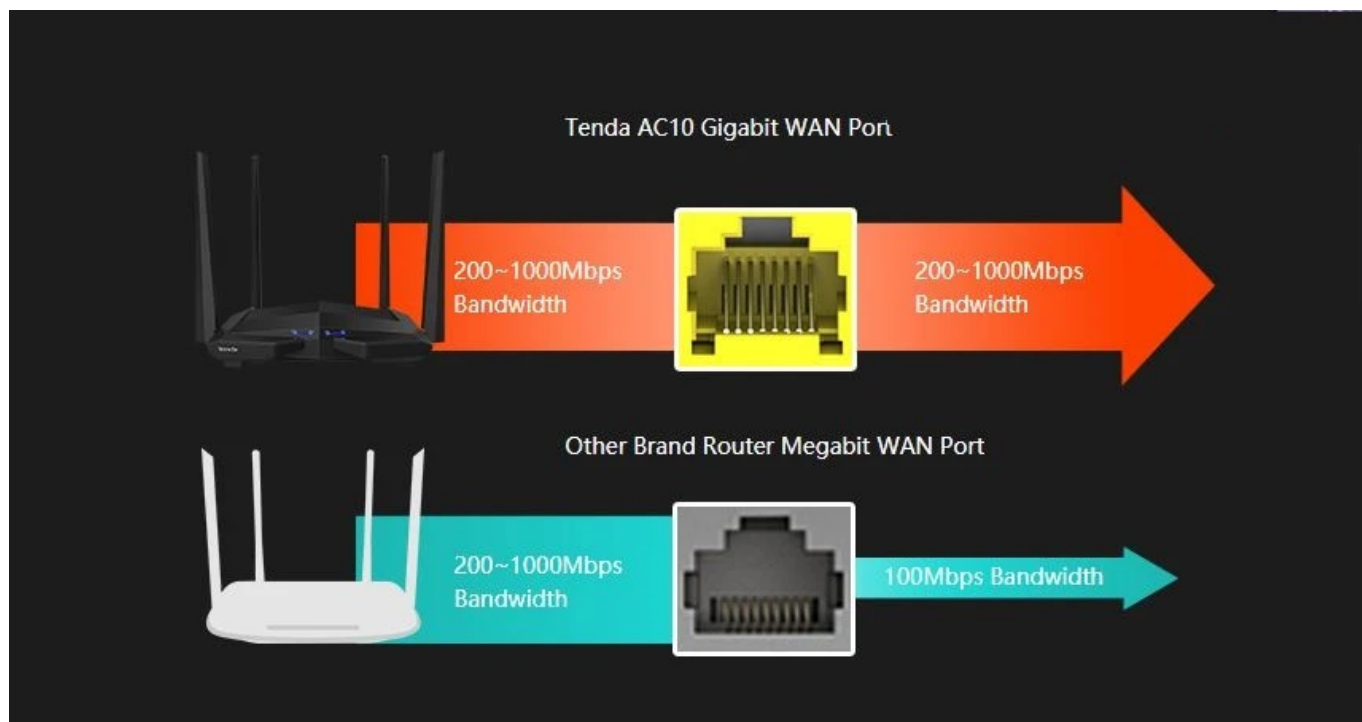

Tenda AC1200 wireless router

Tenda AC10 offers dual-band Gigabit wireless connectivity, with the **latest 802.11ac technology and 5 GHz band**, the device provides wireless transmission several times faster than 802.11n standard. With advanced QoS control, this router is perfect for online gaming, streaming IPTV and HD videos. **The device uses a 1 GHz processor and 128MB of built-in DDR3 memory**, which provides the best performance in both 2.4 GHz and 5 GHz bands. The 2.4 GHz band reaches a speed of up to 300 Mbps and the 5 GHz band up to 867 Mbps, **supporting total throughput of up to 1167 Mbps**.

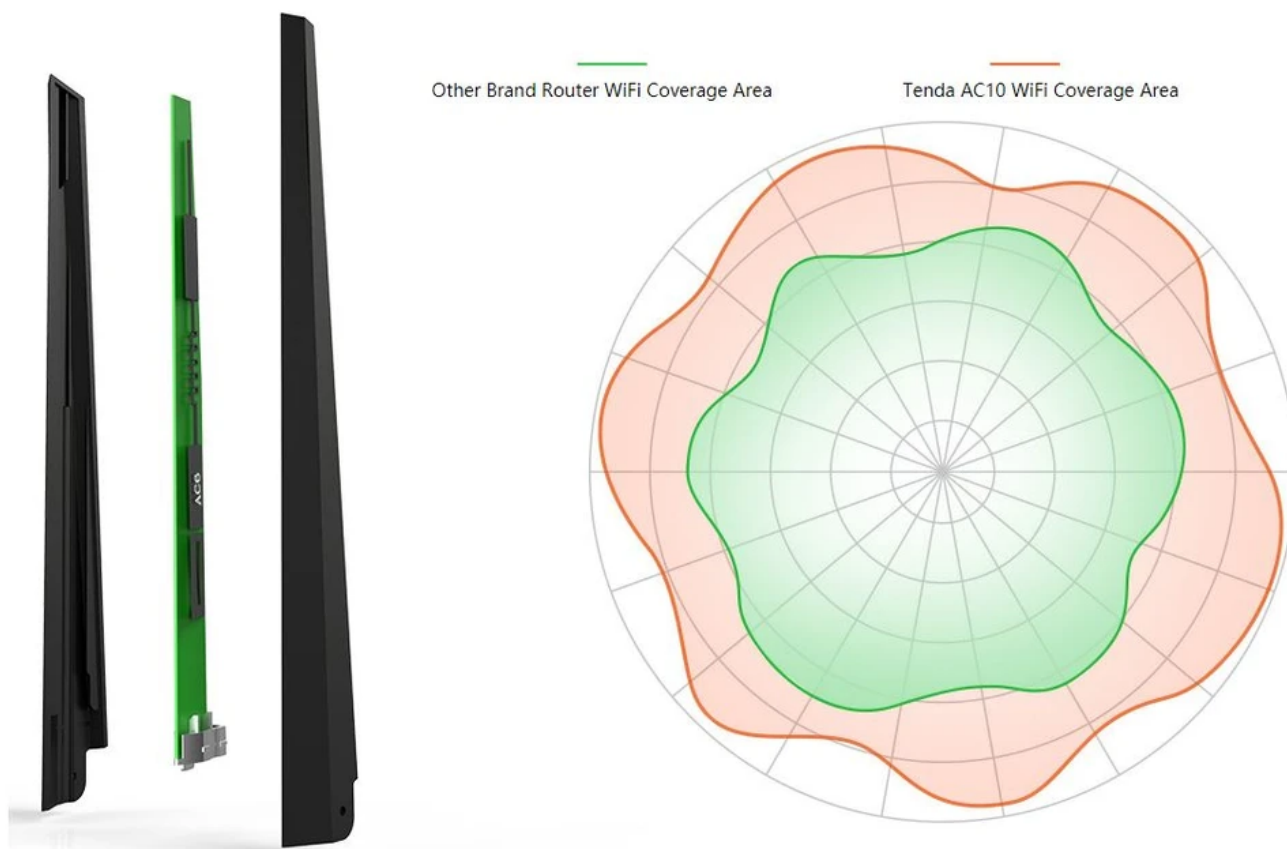

Gigabit performance

The AC10 router has been equipped with 4 WAN ports that allow for gigabit data transmission, both in connection with the Internet and the local network. This high data transmission ensures smooth operation with demanding network applications.

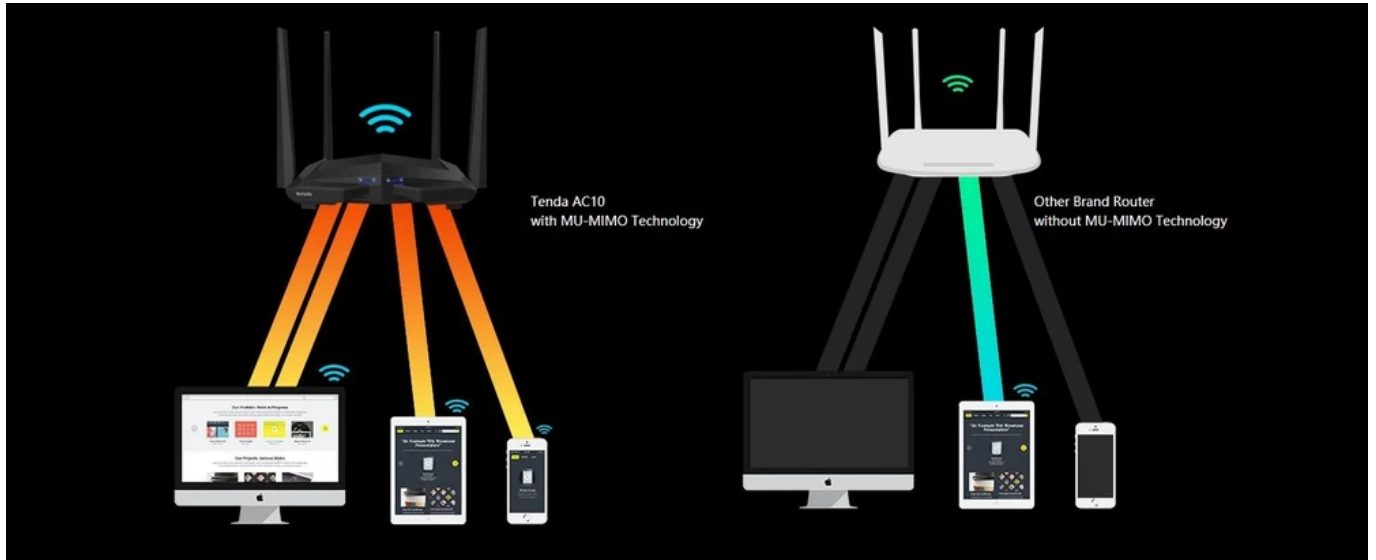

Beamforming function

Thanks to the antenna system used, **Beamforming technology** monitors the location of wireless devices in the network and directs the WiFi signal directly to these devices. In addition, **it constantly monitors and takes into account the movement of mobile devices**, such as mobile phones and tablets. This clever signal distribution specifically amplifies the wireless signal and provides a very stable WiFi connection.

MU-MiMO technology

Tenda AC10 uses the latest **MU-MIMO** technology to communicate with devices, **the standard used allows to reduce transmission waiting time for multiple devices at the same time**. This is a significant change in comparison with previous wireless standards, where the router could only transmit to one device at a time.

Instant configuration

With the Tenda AC10 switch, you can transfer your old PPoE username and passwords from your original router, making **installation and configuration quick and easy**.

Tenda WiFi application

The device has a dedicated **Tenda WiFi** mobile application on **iOS and Andriod**, which allows us to quickly and efficiently configure the device from a mobile phone.

Key features of the Tenda AC10 WiFi router

- High-speed home WiFi router
- Dual-band - 2.4 GHz + 5 GHz
- 4 x external omnidirectional 5 dBi antennas
- Suitable for playing games or streaming Full HD video
- 4 x GLAN (10/100/1000 Mbps) + 1 x GWAN connector (10/100/1000 Mbps)
- Easy configuration with the application
