Full product description

Tenda AC6 dual-band wireless router

With support for all available **802.11 ac / a / b / g / n WiFi** standards, the Tenda AC6 is a universal solution for your wireless network. **The dual-band router operates simultaneously in the 2.4GHz (300 MB/s) and 5 GHz (900 MB/s) bands.** The total WiFi speed it offers is up to 1167 MB/s. The device is equipped with the latest features including **beam shaping technology + innovative MU-MIMO technology.** The router has also been equipped with a chipset from a well-known U.S. manufacturer, Broadcom, which is set so that 4 external omnidirectional antennas create the widest possible range of wireless network.

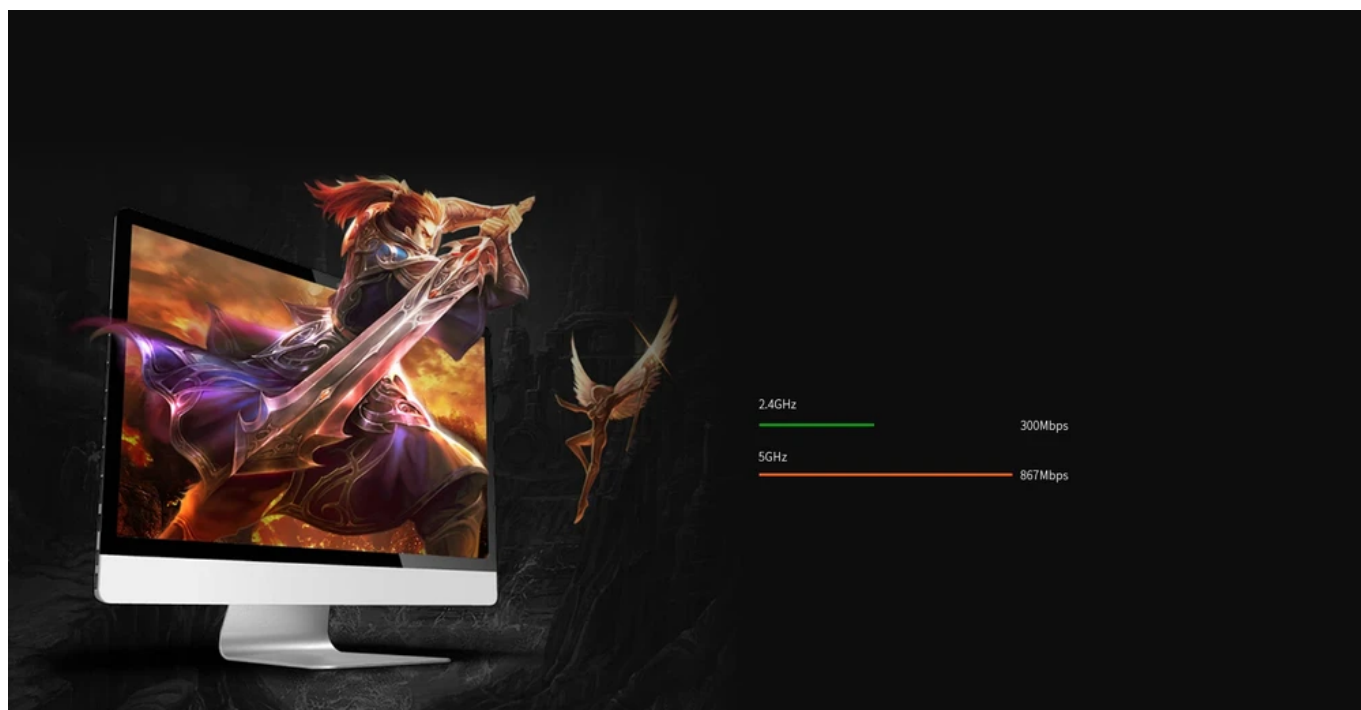

Excellent range

In addition to high speed, **the Tenda AC6** also has a significant signal range, **thanks to the Broadcom chipset** the device works efficiently with 4 antennas, so that the router covers the whole area and at the same time guarantees the highest possible speeds.

Fifth generation Wi-Fi: 802.11ac with dual band connectivity

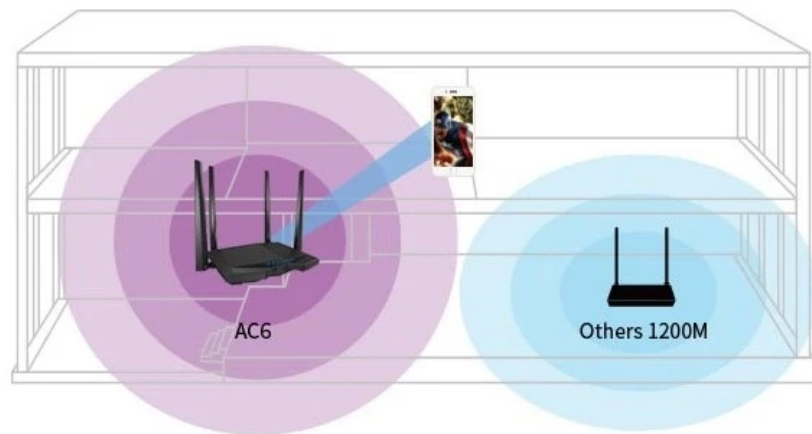

The router complies with **IEEE802.11ac standard**, which **guarantees data transfer rate up to 1176 MB/s**, which is three times faster than 11n routers. Its fast and stable performance makes it ideal for lag-free HD streaming, online gaming and other bandwidth intensive tasks.

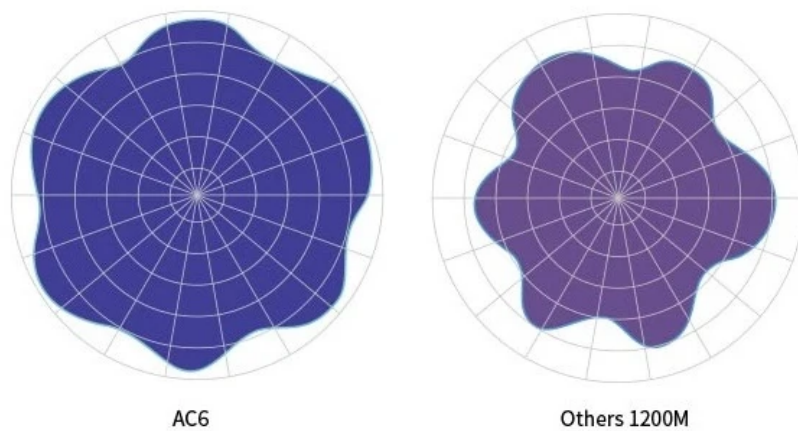

Beamforming +

Advanced **BeamForming +** technology directs Wi-Fi transmissions directly to individual devices according to their location in a three-dimensional space, instead of simply transmitting the Wi-Fi signal in all directions. The standard also reduces interference from other devices, **providing a stronger connection.**

Three-dimensional coverage:

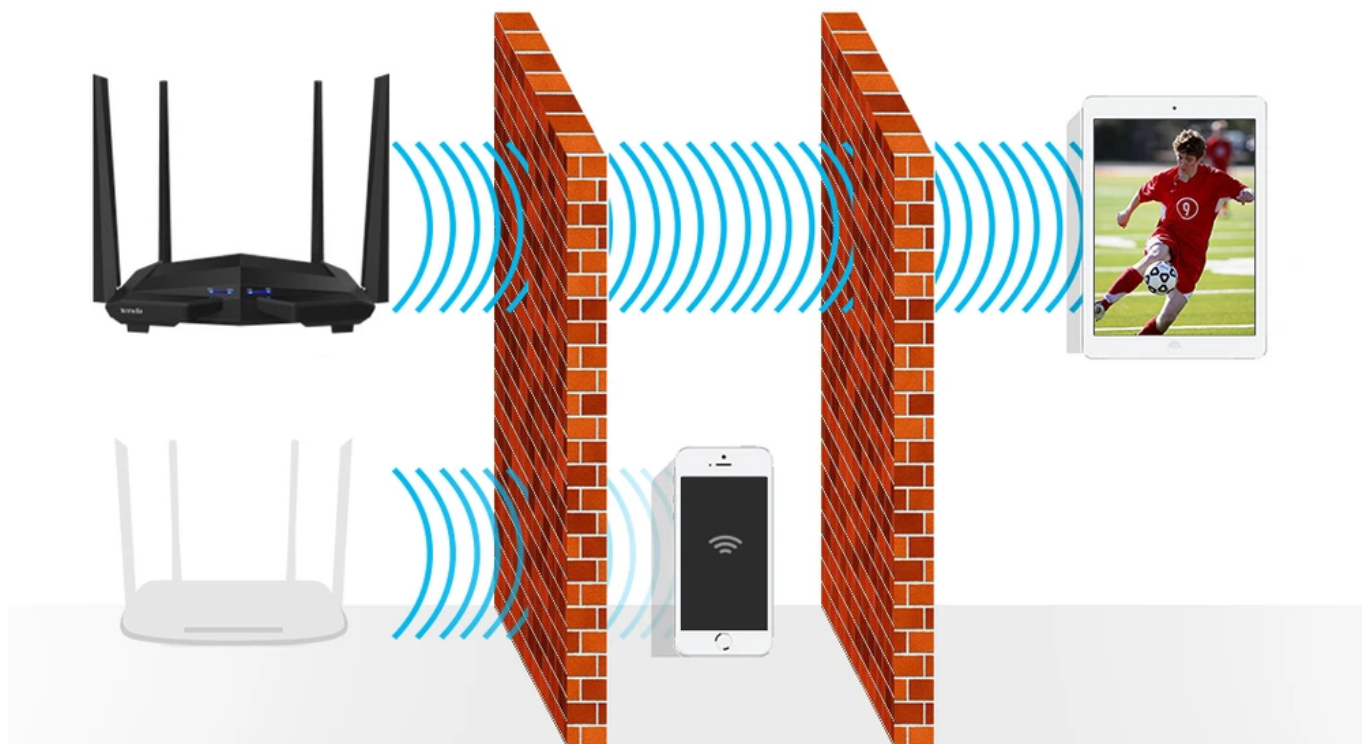

Horizontal coverage:

High power amplifiers

Thanks to high-power amplifiers that operate in **2.4 GHz and 5 GHz** bands, AC6 provides stronger signal through the walls than a normal router, allowing to enjoy uninterrupted connection in every corner of the house.

Key features of the Tenda AC6 WiFi router

- Two-band Internet connection sharing (+ 3 × LAN)
- Speed up to 1200 Mb/s (300 Mb/s at 2.4 GHz + 900 Mb/s at 5 GHz)
- Advanced QoS service for seamless HD and IPTV streaming, online games, VoIP
- Control via mobile applications
- Supports VPN server, PPTP server and PPTP / L2TP client
