Full product description

TENDA F3 300 Mb/s wireless router

Router Tenda F3 provides Internet connections to computers and other network devices, both wirelessly and by cable. Its parameters are suitable for smaller businesses but also for home users to easily share an Internet connection via cable or ADSL modem. Three external antennas increase the performance of Wi-Fi networks throughout the house, **providing great fun while surfing the net**. The Tenda F3 provides a seamless connection and extended range to keep your mobile devices, media players and computers connected in every corner of your home.

Security

The Tenda F3 supports **WPA2-PSK**, security features such as disabling wireless network name display (SSID), **MAC address filtering**, port forwarding and other standard network functions. Content filtering controls access to inappropriate web pages. The device is equipped with **three non-removable omnidirectional antennas with 5 dBI gain**, which ensures maximum range and coverage of the wireless network.

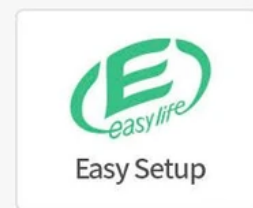

Wireless network range up to 200 m2

Three 5 dBi non-removable antennas provide signal transmission and reception in every corner of the house, **wireless coverage is up to 200 m2** with a maximum data transfer rate of 300 Mbps

Intelligent capacity management - QoS

The router provides adequate bandwidth distribution, so that all users have fully available services and data downloads. **With optimization, there is no network downtime or congestion** for your preferred core services (such as audio, HD video). All communication is ensured for all users without interruption.

Main features of the Tenda F3 router

- Fast Internet access for end devices.
- Standard 802.11 for Wi-Fi speeds up to 300 Mbps.
- 3 external 5dBi antennas
- LAN ports for connecting devices without WiFi.
- Easy to launch.
- Green mode to save energy.
