Full product description

Innovative product

An innovative breast pump with **two phases of stimulation** that mimic the natural movements of a breastfed baby's mouth, supplied with a bottle, is a **modern tool** to support the breastfeeding process.

3 modes of operation

The breast pump offers **three different modes of operation**, allowing you to customize the device according to your preferences and needs. This makes it possible to **optimally adapt the process** to the stage of breastfeeding.

USB fast charging

The innovative **USB** quick-charge system ensures that the breast pump is ready for use in no time. This is a practical solution, especially for busy moms who value **efficiency and flexibility** in using the device. The breast pump is equipped with a long-lasting, high-capacity **lithium battery**, which ensures long-term use without the need for frequent charging. It's ideal for active moms who want to make sure the breast pump is **ready to use anytime, anywhere**.

Large LED display

Equipped with a **comprehensive LED display**, the R-38 breast pump allows you to easily monitor key parameters. **Clear readouts on the display**, such as session time, battery level and mode, provide intuitive control of the device.
