Full product description

5-port Gigabit desktop switch

The Tenda TEF1105P-4-63W is a **switch offering 5 RJ45 BASE-TX 10/100Mbps RJ45 ports**, one of the ports has an uplink and the other 4 ports support 802.3af and 802.3at PoE. The switch supports a stable 8-core PoE power supply, 6KV surge protection. TEF1105P-4-63W has been designed for small and medium businesses as well as for home use.

58 W PoE power supply - simplified cabling

The Tenda TEF1105P offers a maximum output of 58W, while each port provides a maximum PoE output of 30W. **The PoE ports comply with**

IEEE802.3af and IEEE802.3a power standards and the switch can be used to power and exchange data with access points and IP cameras.

Default / extended mode switch

The TEF1005P has two operating modes:

- Default mode - In this mode the device operates as a classic switch, all ports have auto-negotiation and 10/100 Mbps speed
- Expansion mode - In this mode, VLANs are active on each PoE port, each PoE port communicates only with the UPLINK port and not with other PoE ports.

6 kV lightning protection

The TEF11 switch has a professional lightning protection design for ports and power supply, which effectively suppresses the voltage caused by storm surges. During a storm, the device is also designed to ensure stable and reliable operation of the surveillance network and guarantee standardized video transmission.

Key features:

- Ports: 5x 10 / 100Mbps RJ45 with auto-negotiation, and 4 PoE ports supporting IEEE802.3 at / af
- Total capacity: 1 Gb / s
- The size of the MAC address plate: 1 KB
- Switching mode: Store-And-Forward
- LED indications: 5x Line / Activity, 4x PoE status, 1x Power, 1x 100Mbps
