Full product description

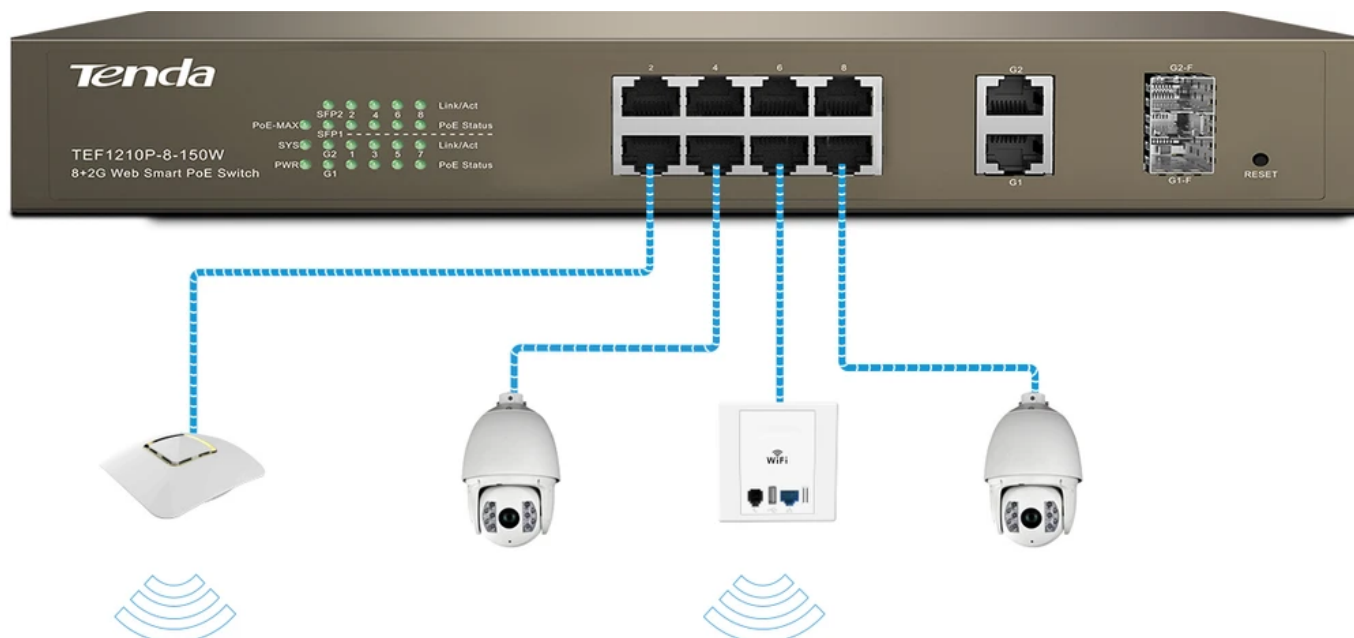

TEF1210P-8-150W

Tenda TEF12 is an 8-port PoE switch with two **10/100/1000 Mbps** Gigabit ports **and two SFP (combo) slots**. Total PoE power can be 123 W, while each PoE port can support up to 40 W. The device supports QVLAN, link aggregation, QoS, MAC binding, port mirroring, speed limit, trunk, and browser and SNMP management. **The device has 6000 V port lightning protection.**

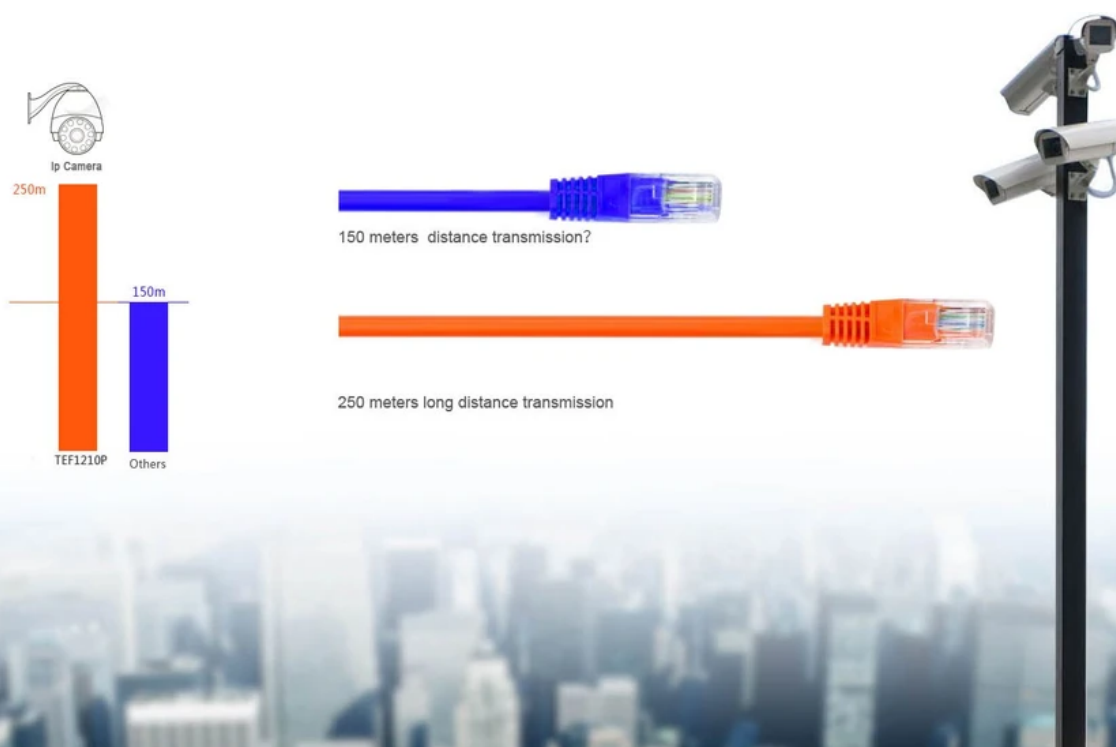

Total PoE power 123 W

The device, thanks to its PoE ports, reduces losses caused by the quality of cabling, ensuring stable power supply to the cameras. **Total PoE power is 123W**, allowing TEF12 to power all 8 ports (40W per port).

Data transmission up to 250 meters

When designing cabling and creating networks, a very common problem encountered is insufficient network transmission distance. The TEF1210P uses Tende's patented network extension technology using common existing twisted-pair cables that **can support data transmission up to 250 meters**.

Switch with 6 KV lightning protection

The surveillance cameras are often installed outdoors or mounted at high altitudes, which significantly increases the risk of lightning to prevent damage Tenda TEF12 is equipped with a professional lightning protection circuit up to 6kV. This system guarantees stable, reliable operation against disturbances caused by stormy weather.
