Full product description

Tenda smart switch TEF1218P

The Tenda TEF1226P is an **intelligent PoE switch with 24 IEEE 802.3at/af compliant RJ45 ports**, providing maximum PoE output of 250W. The switch can be used to power IP cameras and IP phones via CAT5 cable. **The Tenda TEF1226P** has an intelligent management function and an innovative 250m power supply method that minimizes the difficulty and cost of network entry. The device is dedicated for monitoring or networks for small and medium businesses.

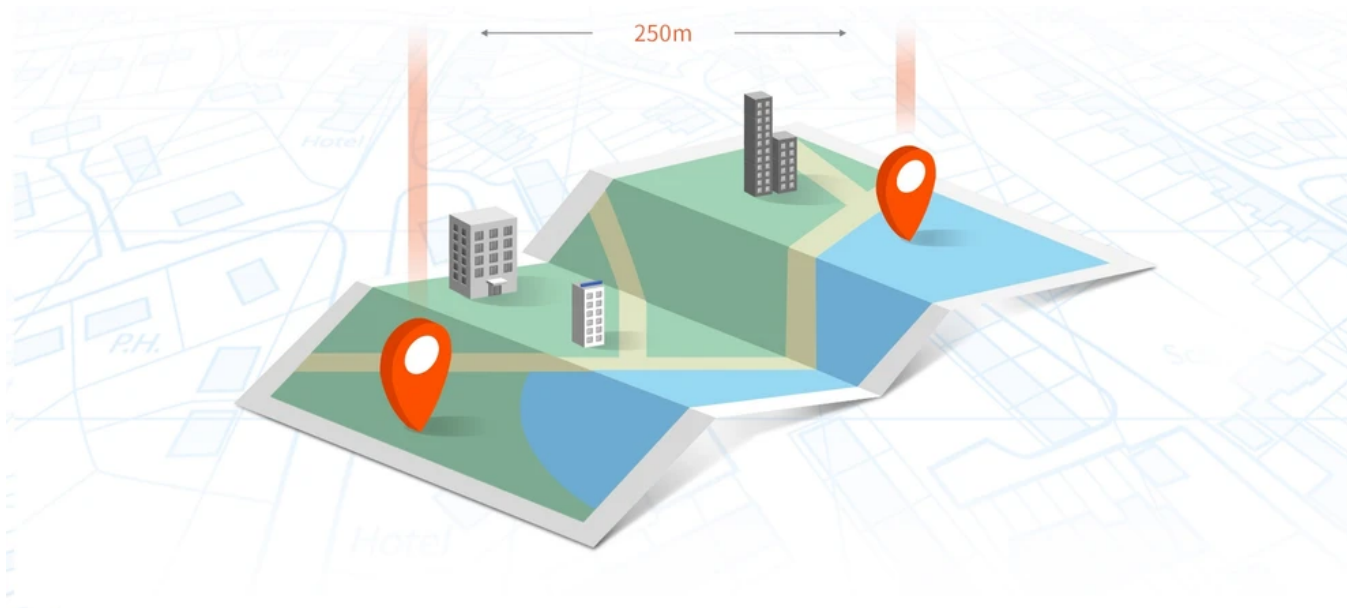

GE and SFP uplink ports, large buffer almost 3M

Tenda TEF1226P switch has space for **SFP 10/100/1000 Mbps socket**, which is capable of meeting the current demand for Gigabit WLAN capacity. The switch with cooperation with Tenda TEG311SM fiber optic module is capable of supporting maximum transmission distance up to 20km.

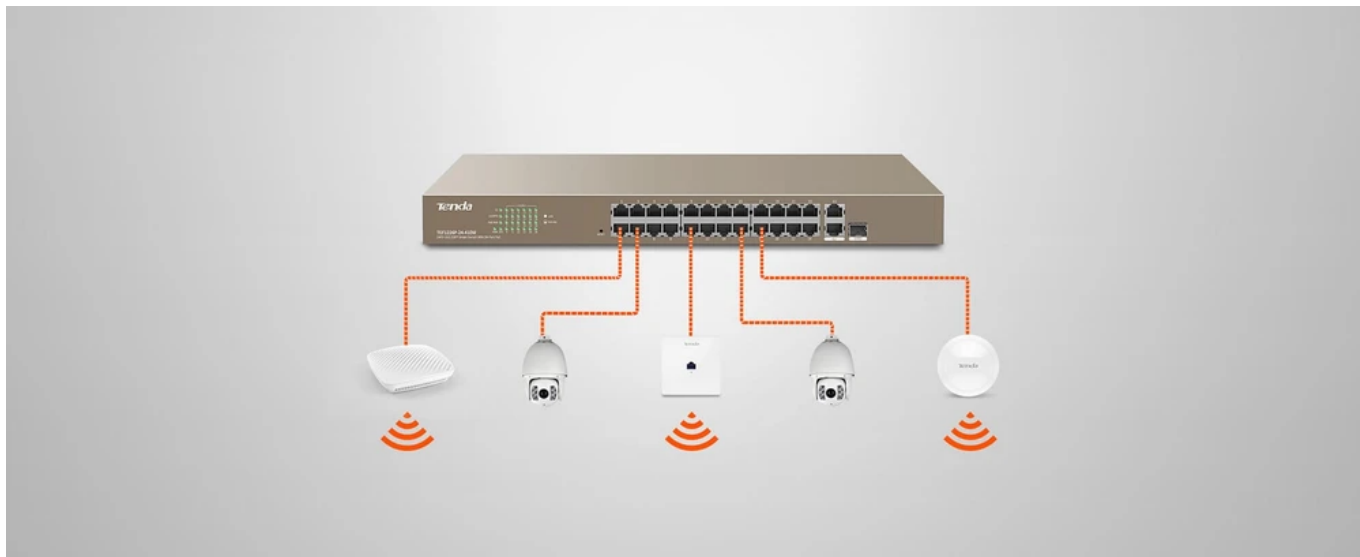

Transmission up to 250 meters

The complex monitoring environment is often scattered over long distances, with some distances as far as more than 100 m from the terminal to the monitoring centre. **The TENDA TEF1226P-24-440W can handle transmission over a distance of 250 meters**, which allows to significantly save project costs with less equipment.

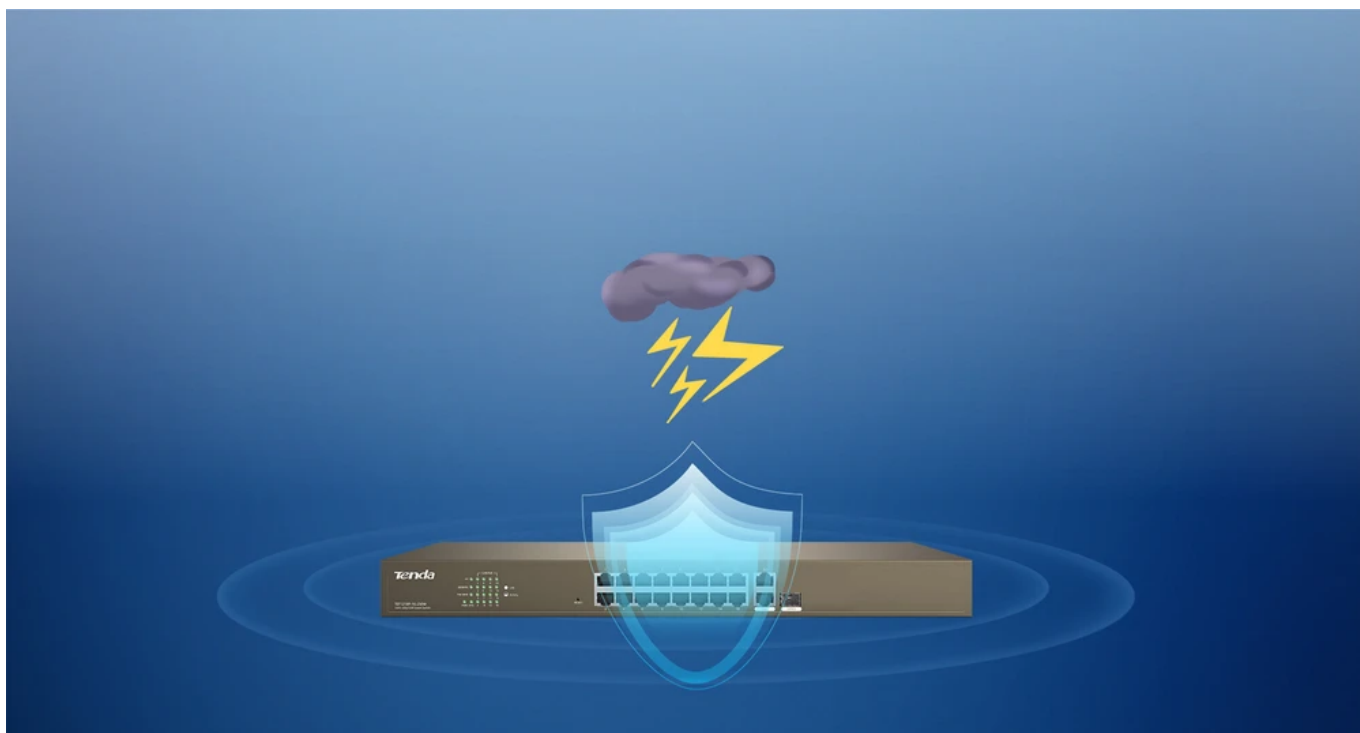

Power supply PoE 230 W

The switch has 24 RJ45 ports that comply with IEEE 802af/at standard. **The total output power of the PoE switch is 230 W and the distance of a single port is 30 W.** The PoE ports can be used to power e.g. IP cameras.

Excellent 6KV lightning protection

The device is designed to support 6kV lightning protection and PoE port overload protection so that the switch is adequately protected against overvoltages.

Intelligent Management via WWW

The TENDA TEF1226P uses an external web management service to provide a more intuitive and user-friendly interface.
