Full product description

Tenda switch TEG1016D

The **TEG1016D switch** is designed both for small and medium businesses and for home use. The device is fully automatic and does not require any unnecessary configuration, just connect the power supply and individual Ethernet cables and the TEG1016D takes care of everything. **The switch has 16 10/100/1000 Mbps RJ45 ports** with auto-negotiation up to 2000 Mbps, and support for node switching is in Store-and-Forward mode, ensuring fast transfer through all ports and high cache capacity.

Power supply with professional lightning protection

The device has a professional lightning protection system, the built-in power supply module has been designed for increased lightning protection, which can withstand a lightning voltage up to 6 kV, 3 times higher than normal switches. **The applied system effectively protects the switch against damage during a storm.**

Innovative design

Specially designed steel casing and holes in the three walls of the device allow for efficient heat dissipation. The switch is not equipped with fans, thanks to which the device guarantees silent operation, ensuring high standard of work. Thanks to its 13-inch size the device fits into the office space, in addition TEG1016D can be mounted both on a desk and on a stand.
