### Information:

Extralink Smart Life S11 is a foldable, portable set of two additional 16" screens for 12-18.5" laptops, expanding your workstation without taking up space with separate monitors. It supports Windows and macOS, and when folded it is easy to carry in the included bag. IPS 1920 × 1200 panels in a 16:10 aspect ratio provide more space for working with documents, spreadsheets, code and applications, while the three-screen layout increases multitasking comfort. The device offers two USB-C ports and HDMI, plus a full set of cables, making it easy to connect quickly in the office, at home and on the move.

### Full product description

#### Flexible fit for laptops of different sizes

Extralink Smart Life S11 allows you to expand your computer workstation with two additional screens without taking up space with separate desktop monitors. The adjustable design is suitable for laptops with a diagonal of 12 to 18.5 inches, so the set can work with devices of various sizes. The grey casing creates a cohesive whole with the workstation equipment, and the foldable design makes it easy to store the device after

work. The dimensions of the set are 389 × 246 × 39.6 mm, while its weight is approximately 2 kg.

## Compatibility with Windows and macOS systems

Extralink Smart Life S11 supports computers running Windows and macOS, allowing the set to be used in the office, at home and for mobile work. The additional screens help divide programs, documents, messengers, graphic materials and analytical tools between several work areas. The compatibility limitation applies to MacBooks equipped with Apple M1, M2 and M3 processors, so it is worth checking the model of the computer before connecting. The set does not have built-in speakers, so sound is played through the laptop or a connected audio device.

## Foldable design and equipment for easy transport

When folded, Extralink Smart Life S11 takes on a compact form that makes it easy to carry the set between home, the office and meeting places. A carrying bag is included with the device to help protect the monitors and keep the accessories organised. The package includes two USB-C to USB-C cables, one mini HDMI cable, a USB-A charging cable and a user manual. This set allows you to prepare a workstation in different locations without having to carry separate desktop monitors and their stands.

## Two additional 16-inch screens for multitasking

The S11 model offers two 16-inch screens which, when unfolded, can be positioned on both sides of the laptop display. This layout allows you to use three work areas at the same time and helps reduce frequent switching between windows. You can display a document or spreadsheet on one screen, source materials on the other, and communication tools on the laptop screen. This solution is ideal for data analysis, video conferencing, programming, preparing presentations and using several applications at once.

# WIĘCEJ PRZESTRZENI DO PRACY

Dwa dodatkowe ekrany 16"

## IPS panels with a resolution of 1920 × 1200

Both displays use IPS panels with a resolution of 1920 × 1200 pixels, a refresh rate of 60 Hz and a 16:10 aspect ratio. The greater vertical space helps when working with documents, websites, code and extensive spreadsheets. W-LED backlighting, brightness of up to 250 cd/m<sup>2</sup>, a contrast ratio of 1000:1 and 45% NTSC colour gamut coverage enable clear presentation of office and multimedia content. The response time is 25 ms, and the viewing angles are specified as 89° horizontally and 89° vertically at CR ≥ 10.

## Two USB-C ports and an HDMI connector

Extralink Smart Life S11 is equipped with two USB-C ports and an HDMI connector. Each of these connections supports image output at a resolution of 1920 × 1200 at 60 Hz, allowing you to choose the connection method according to the available laptop ports. The device's power parameters are 5 V and 3 A, input power is 15 W, and standby power consumption does not exceed 4.5 W. The set is designed for use at temperatures from 5°C to 40°C and relative humidity from 10% to 70%.
