Full product description

Expand your laptop desktop with a 15.4-inch screen

Extralink Smart Life S3 allows you to expand your laptop workspace with one additional screen. The 15.4-inch IPS panel displays images in Full HD resolution of 1920 × 1080 pixels and a 16:9 aspect ratio. The extra surface can be used to display documents, messaging apps, spreadsheets, browsers or multimedia content without the need to constantly switch windows.

IPS panel with W-LED backlighting

The IPS screen with W-LED backlighting offers brightness of up to 250 cd/m², a 1000:1 contrast ratio and 45% NTSC colour gamut coverage. Viewing angles are 89° vertically and horizontally at a CR $\geq$ 10 contrast ratio, so the image remains clear even when viewed from the side. Pixel pitch is 0.1611 × 0.1611 mm.

Full HD image with 60 Hz refresh rate

The 1920 × 1080 pixel resolution makes it easy to work with text, tables, photos and video content. The 60 Hz refresh rate ensures smooth display of scrolling pages and moving content, while the panel response time is 25 ms. The monitor can serve as an extended desktop or as additional space for tools used during work.

Portable design for working away from the office

Extralink Smart Life S3 measures 408 × 239 × 25.3 mm and weighs about 1.08 kg. The design makes it easy to take the extra screen to the office, hotel, coworking space or on a business trip. The included carry case helps store the monitor together with the other items in the set.

Two USB-C ports and a mini HDMI connector

The monitor is equipped with two USB-C ports and one mini HDMI connector, which support images at 1920 × 1080 resolution at 60 Hz. The model is compatible with Windows and macOS, making it easy to match with the computer you use. The device has no built-in speakers, so sound is played through the laptop, headphones or an external audio system.

Cables and carry case included

The set includes a USB-C to USB-C cable, a USB-A to USB-C cable, a mini HDMI cable, a carry case and a user manual. The monitor operates with 5 V / 3 A power supply and a 15 W input, while power consumption in standby mode is less than 4.5 W. The operating temperature range is from 5°C to 40°C, and the permissible humidity during use is 10–70%.
