### Information:

Extralink Smart Life S300 is a foldable, mobile set of two additional 13,3" laptop screens that creates a convenient three-monitor workstation. Full HD 1920 × 1080 IPS panels provide a clear image and wide viewing angles, making it easier to work with documents, tables, presentations and multimedia. The adjustable design lets you adapt the screen position to your workstation, fold it for transport or show the image to someone next to you. The model is compatible with 13,3-17,3" laptops and Windows and macOS systems, including Apple M1/M2/M3. USB-C connection reduces the number of cables, and the included bag and accessories make it a practical solution for the office, study and travel.

### Full product description

#### Clear image on two additional screens

Extralink Smart Life S300 expands a laptop with two 13.3-inch screens, making it easier to work simultaneously with several applications, documents or multimedia materials. Each monitor uses an IPS panel and a resolution of 1920 × 1080 pixels. Wide viewing angles help keep the image legible when looking at the screen from different positions, while the Full HD format makes it convenient to review text, tables, photos

and presentations.

### Flexible design tailored to your workstation

The foldable design allows the screens to be positioned according to the layout of the workspace and the task currently being performed. The left monitor can be adjusted from 0° to 235°, while the right one from 0° to 180°. This makes it possible to direct the image towards the user, fold the set for transport, or position one of the screens so its content can be shown to a person sitting next to you. Setting up and folding away does not require creating a separate workstation with desktop monitors.

### Compatibility with laptops from 13.3 to 17.3 inches

Extralink Smart Life S300 is designed for laptops with screen sizes from 13.3 to 17.3 inches. The adjustable width of the design ranges from 293 to 413 mm, allowing the set to fit devices of different sizes. The monitor works with computers running Windows and macOS, including devices equipped with Apple M1, M2 and M3 chips. The USB-C connection helps reduce the number of cables needed on the desk.

Windows

macOS • M1 • M2 • M3

### Mobile set ready for transport

The foldable form of the set means the two additional screens can be taken to the office, a meeting, university or a business trip. The set includes a carry case that helps protect the device and keep its components in one place. The package also includes the necessary cables, a driver and mounting accessories. As a result, Extralink S300 can serve as a mobile workstation wherever a compatible laptop is available.

Monitor • przewody • sterownik • akcesoria

### More space for work and task organisation

Two additional monitors allow you to create a three-screen workstation without the need for separate desktop monitors. Each of the side screens has a 13.3-inch diagonal, an IPS panel and Full HD 1080p resolution. This setup makes it easier to separate a messenger, documents, spreadsheets and source materials across the individual screens. It helps reduce frequent window switching and maintain an organised view while carrying out several tasks.

Full HD 1080p

## Three screens in one workstation

Extralink Smart Life S300 is ideal for working with documents, analysing data, holding online meetings, programming and preparing presentations. The main document can be displayed on one screen, supporting materials on the second, and a messenger or video conference on the third. The expanded workspace helps organise information and allows several sources to be viewed at the same time. After work is finished, the side monitors can be folded away and stored together with the accessories.
