Full product description

Tinycontrol temperature/humidity/pressure sensor

The sensor is based on the BME280 system manufactured by Bosch-Sensortec. The module communicates via the I2C or SPI bus and is powered by 3.3 V. It can be used in solutions such as a weather station as it measures up to 3 parameters. Apart from the sensor, the set includes a converter board with RJ12 socket and a cable with 20cm connectors. On the board there are also 2 connectors for DS18B20 sensors without plugs.
