Price: **1,099.01 zł** gross / 893.50 zł net

Manufacturer: EXTRALINK

Referention number: DNXGGOQLJRMPL

Information:

Extralink Smart Life S7 is a portable screen extender for laptops up to 17 inches, adding two 14-inch IPS displays and creating a convenient three-screen workstation. The 1920 × 1200 resolution in 16:10 format provides more vertical workspace, while 250 cd/m² brightness, 60 Hz refresh rate and wide viewing angles are ideal for office work, studying and online meetings. The screens can be rotated through 360°, allowing the setup to be adjusted as needed. The foldable design weighs approx. 1.61 kg and is easy to carry in the included case. The device supports USB-C and HDMI, works with Windows and macOS, and comes with the necessary cables, power supply and carry bag.

Product features

Orientation	Horizontal
Display diagonal	14 "
Fits	12"-17"
Ilość ekranów	2
Obsługiwane platformy i systemy operacyjne	Windows/macOS (z wyjątkiem M1/M2/M3)
Rozdzielczość ekranu	1920x1200

Full product description

Extralink Smart Life S7 - more space for work

Extralink Smart Life S7 expands a laptop workstation with two additional 14-inch screens. It enables simultaneous display of documents, a messenger, a spreadsheet, a presentation or other applications without constantly switching windows. The design is intended for use with

laptops up to 17 inches, making it suitable for office work, study, online meetings and completing tasks away from a fixed workstation. The grey housing creates a cohesive whole with the computer and the other elements of the desk setup.

Two IPS displays with a resolution of 1920 × 1200

Each of the two Extralink Smart Life S7 screens uses an IPS panel with a resolution of 1920 × 1200 pixels and a 16:10 aspect ratio. This format offers extra vertical space, which helps when working with documents, websites and large spreadsheets. The displays use W-LED backlighting, achieve brightness of up to 250 cd/m² and operate at a refresh rate of 60 Hz. The specification also includes a 25 ms response time, 45% NTSC colour gamut and the wide viewing angles of an IPS panel.

Screen adjustment up to 360°

Movable hinges allow the additional screens to be rotated through up to 360°. This makes it possible to position them on either side of the laptop, turn one of the displays towards another person, or fold the unit for transport. Adjustment helps match the position of the panels to the width of the workstation, the viewing angle and the type of task being performed. The integrated support stabilises the set placed on the desk,

so the weight of the screens does not rest solely on the laptop housing.

Foldable design for a mobile workstation

When folded, the device measures approximately 346 × 219 × 39.6 mm, so it can be stored together with other computer accessories. A weight of around 1.61 kg makes it easy to take the set to the office, conference room, hotel or study space. The included carry case helps protect the housing and screens during transport. Once unfolded, the design allows you to quickly recreate a workstation with three displays without using two separate desktop monitors.

USB-C, HDMI and the necessary accessories

Extralink Smart Life S7 offers two USB-C ports and an HDMI connector, supporting image output at 1920 × 1200 at 60 Hz. The set includes two USB-C to USB-C cables, an HDMI cable, a USB-A to USB-C cable, a 30 W PD power adapter, a carry bag and an instruction manual. Standard power parameters are 5 V/3 A, and the device input power is 15 W. Power consumption in standby mode does not exceed 4.5 W. The model does not have built-in speakers.

Support for multiple applications on three screens

The two additional displays help organise applications used during everyday work. One screen can be used for a video conference, another for browsing materials, while the laptop screen is used to edit a document or presentation. The model works with Windows and macOS, except for MacBooks equipped with Apple M1, M2 or M3 processors. The intended operating temperature range is from 5°C to 40°C, while the permissible humidity during use is between 10% and 70%.
