Full product description

Tinycontrol light intensity sensor

Tinycontrol light intensity module. The module is made in a version on a PCB, it has 3 pins in a 2.54 mm raster to connect to the lan controller.

The module is powered by 5V DC, a photoresistor and LM393 comparator are used as transmitters. Power supply status is indicated by an LED on the board. Compact dimensions: 36 x 14 mm make the device easy to mount in any place.
