Full product description

Tinycontrol Relay Board 10A x 4

A board with four relays on board allows independent control of four devices with a maximum current of 10A each. This allows us to switch on, off and reset the devices. After connecting the board to a lan controller, we can do it remotely via the Internet or LAN. The device is delivered in a plastic casing. Included are a control cable with 10cm plugs 2xIDC10 and housing with a bracket for mounting on a DIN rail.
