Price: **249.00 zł** gross / 202.44 zł net

Manufacturer: TOTOLINK

Referention number: DNKGJQJIRMMOL

Information:

Totolink BE3600R is a dual-band Wi-Fi 7 router designed for a fast, stable and secure home network. It offers MLO, 4K QAM, OFDMA, MU-MIMO and WPA3 technologies, ensuring lower latency, better performance and data protection even with many devices connected at the same time. Speeds of up to 688 Mb/s on 2.4 GHz and up to 2882 Mb/s on 5 GHz are ideal for 4K streaming, online gaming and remote working. Four external 5 dBi antennas with Beamforming improve coverage, while Easy Mesh makes network expansion simple. A dual-core 1 GHz processor, the TOTOLINK Router APP, parental controls and a Wi-Fi schedule provide convenient operation and full control.

Full product description

The future of home Wi-Fi

Experience the power and speed of the **Totolink BE3600R**, a dual-band **Wi-Fi 7** wireless router that transforms your Internet experience. Designed to meet the demands of home networks, the device guarantees a stable and fast connection for multiple devices simultaneously. With technologies such as **Wi-Fi 7**, **MLO (Multi-Link Operation)** and **WPA3 (Wi-Fi Protected Access 3)**, the BE3600R delivers the fluidity and security that transform the way you work, play and relax online.

Dual-band Wi-Fi 7

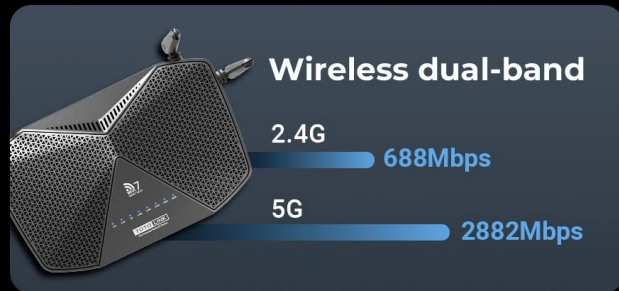

wireless Router

BE3600R

Key advantages of Totolink BE3600R router

- **Wi-Fi 7 and MLO:** Better performance and lower latency with band aggregation.
- **4K QAM:** Accelerated data transmission by 20%.
- **Easy Mesh:** Quick and easy Wi-Fi network expansion.
- **Beamforming:** Stronger signal and greater network coverage.
- **1 GHz dual-core processor:** Smooth and efficient management of network traffic.
- **Parental Control:** Enables you to use the Internet safely.

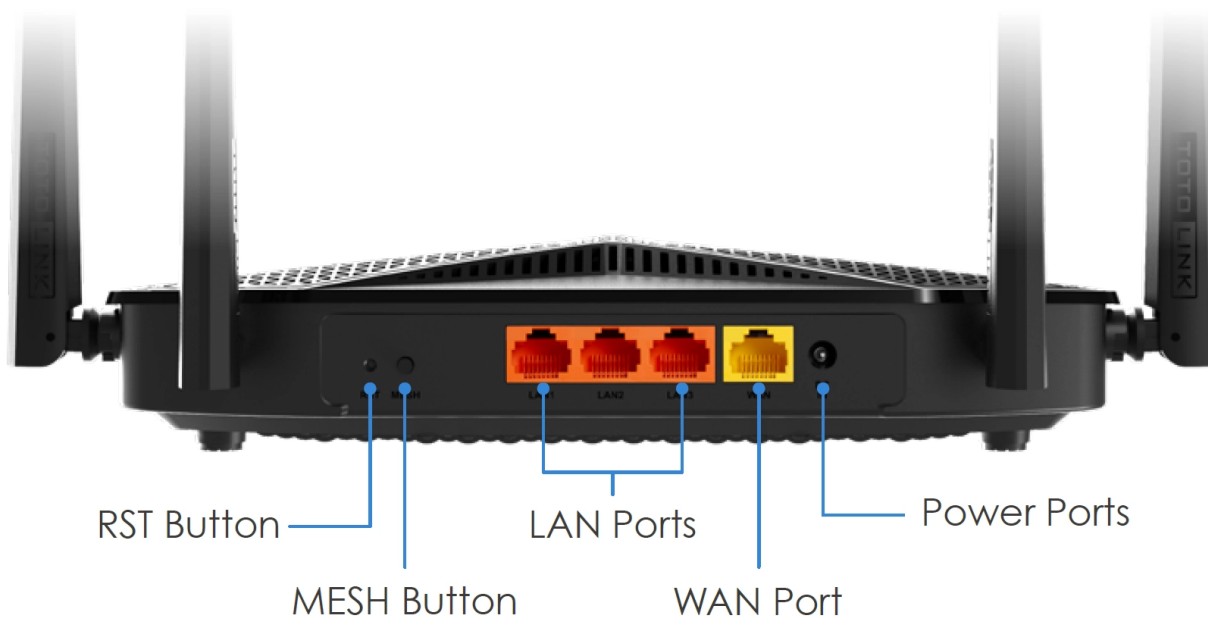

Network without delays

The Totolink BE3600R uses **OFDMA (Orthogonal Frequency Division Multiple Access)** technology with **MRU (Multiple Resource Unit)**, which significantly improves the efficiency of data transmission, reducing latency and enabling a stable connection for multiple devices simultaneously. Whether you're videoconferencing in 4K quality or playing games that require high-speed transfers, the router makes sure your network runs smoothly and without interruptions. Speeds of up to **688 Mbps on the 2.4 GHz band** and up to **2882 Mbps on the 5 GHz band** make downloading large files and streaming media a pleasure.

Easy to use, full control

Quick setup is one of the key advantages of this router. Thanks to a user interface optimized for phones and a dedicated TOTOLINK Router APP, getting started and managing the network is intuitive and requires no specialized knowledge. The router also offers features such as **Parental Control**, which helps manage content and time spent online, and **Wi-Fi Scheduler**, which allows you to automatically turn your network off and on.

Stability and range

Four external **5dBi** antennas combined with **Beamforming** technology direct Wi-Fi signals directly to connected devices, strengthening the connection and extending the range. This solution is especially useful in large homes or offices where the network needs to reach every corner. In addition, **Easy Mesh** technology allows you to seamlessly extend the range of your wireless network, creating a unified and consistent network with seamless switching between access points.

More power for devices

At the heart of the router is a **dual-core 1GHz processor** that effectively manages network traffic, ensuring efficient operation even under heavy load. The **4K QAM (Quadrature Amplitude Modulation)** technology increases the transmission speed by 20%, resulting in better performance. In addition, **Preamble Puncturing Technology** and **MU-MIMO (Multi-User Multiple Input Multiple Output)** optimize channel utilization, which contributes to higher performance and reduced interference.

The Totolink BE3600R WiFi7 router is a great option for:

- **Home users** looking for a fast and stable Wi-Fi network.
- **Online gamers and streamers** for whom minimal latency is crucial.
- **Families with multiple devices** connected to the network simultaneously.
- **Individuals working remotely** who need a reliable connection.
- **Owners of large homes** who want consistent coverage in every room.
