Full product description

Totolink EX1200M - dual band AC1200 Wi-Fi signal amplifier

Totolink EX1200M is designed to increase the existing network coverage, with **wireless transmission speed** up to 1167 Mbps. It converts single band Wi-Fi to dual band wireless and is compatible with **Wi-Fi 802.11ac and b/g/n** devices. The wall outlet design saves space and is ideal for very large homes to reduce Wi-Fi dead spots and enjoy HD video streaming, online gaming, etc. If you are wondering what signal amplifier to use in a big house, Totolink offers you an excellent solution.

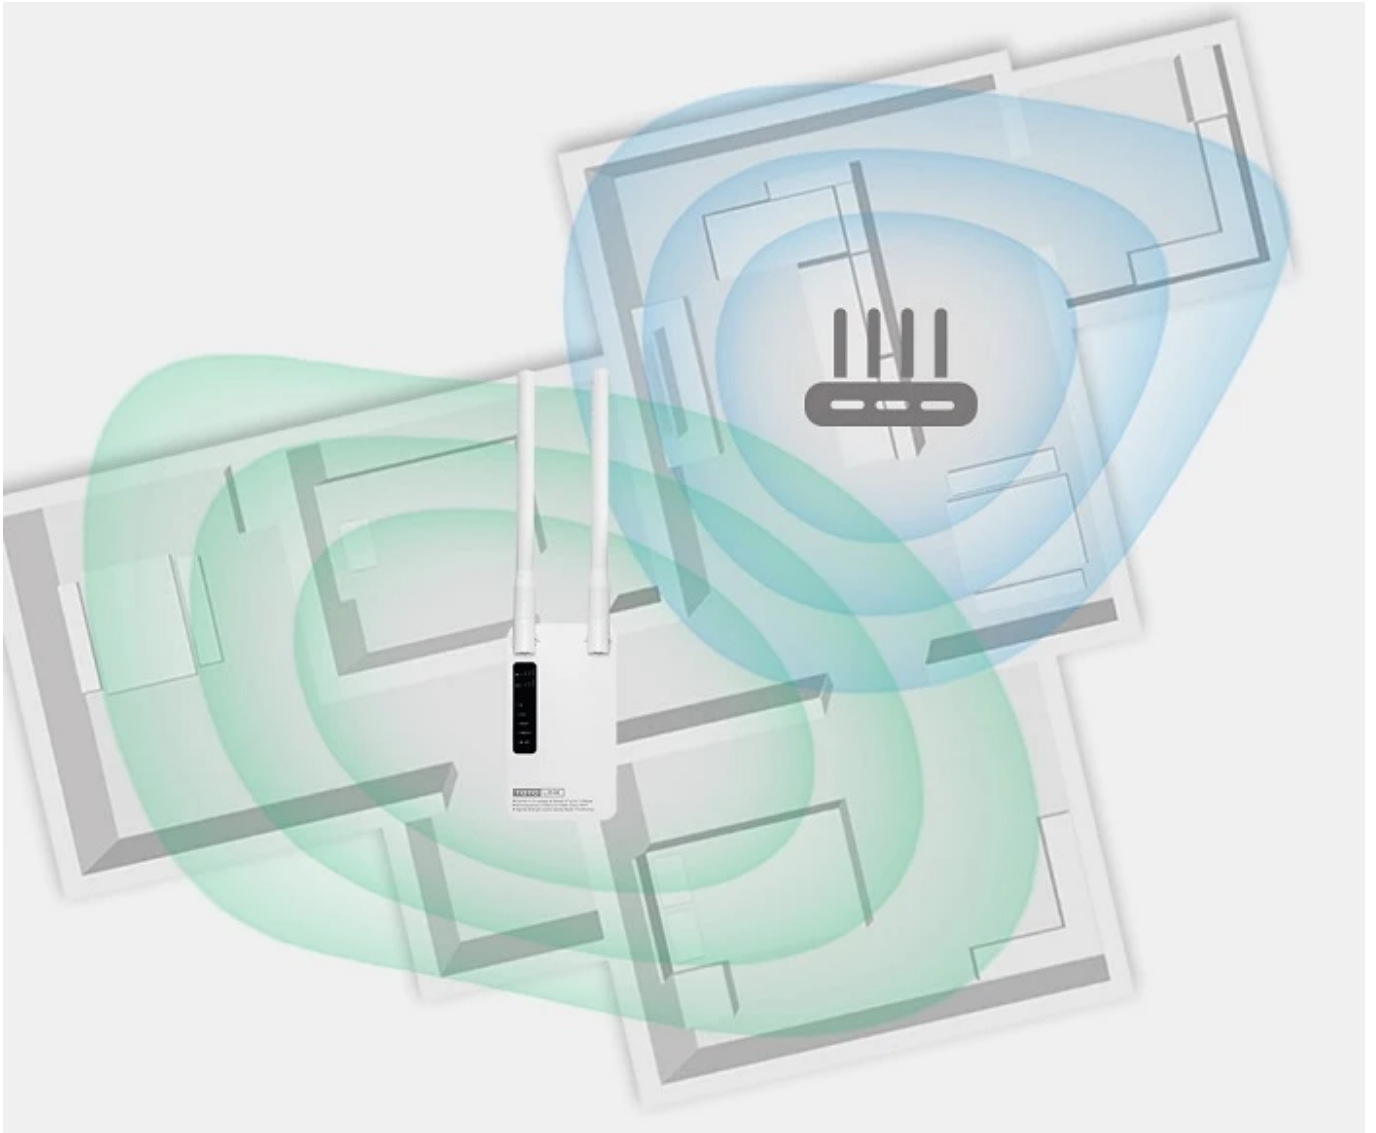

Features:

- Compliance with 802.11ac/a/b/g/n standards
- Transforms single-band Wi-Fi to dual-band Wi-Fi
- Provides up to 300 Mbps in 2.4 G band or 867 Mbps in 5 G band
- Two external antennas increase bandwidth stability
- Supports a handy application for flexible Wi-Fi extension and network management
- Supports easy and quick configuration via smartphones
- Supports WPS (Wi-Fi Protected Setup) with one click
- Two LED signal strength indicators help to achieve the optimal position for the amplifier
- Supports two operating modes: AP mode and amplifier mode
- Wall plug design saves space

Extremely fast throughput - perfect for home entertainment

The EX1200M uses next-generation 802.11ac technology and delivers **Wi-Fi** throughput up to 1200 Mbps, which is optimized for bandwidth-hungry applications such as HD movies and online games.

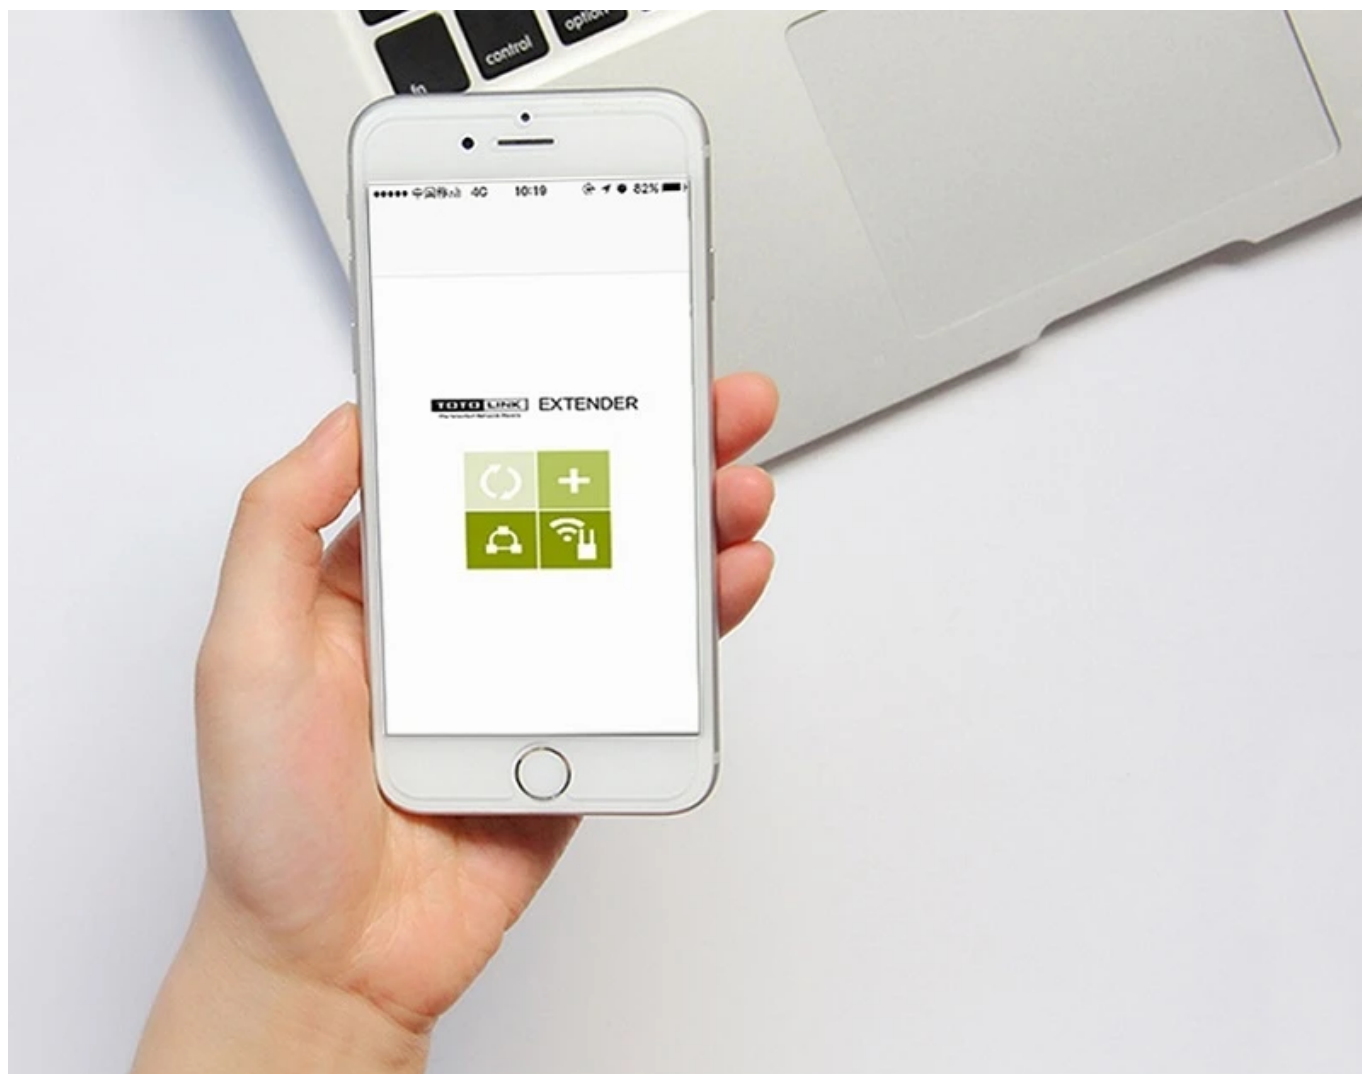

Dualband Wi-Fi

Dual-band support helps you expand your existing 2.4G or 5GHz Wi-Fi signal at high speed and further away, turning one Wi-Fi band into a double band and reducing the number of Wi-Fi dead spots.

Easy and quick configuration via smartphone

The EX1200M supports smartphone setup, simply connect the phone to the device and the user settings page will be displayed after a while. You can expand your existing Wi-Fi network in practically three steps.

Signal strength LED lights for better positioning

Two LED signal strength indicators show the strength of the Wi-Fi signal from the original WLAN, so you can place the amplifier in the optimal position for the best Wi-Fi coverage.

Dobre połączenie

Zbyt daleko od routera

One click - safe signal extension

You press the WPS button on both the EX1200M and the wireless router and a secure home Wi-Fi network (2.4G or 5G) can be quickly established to extend the range of your existing WLAN.
