Full product description

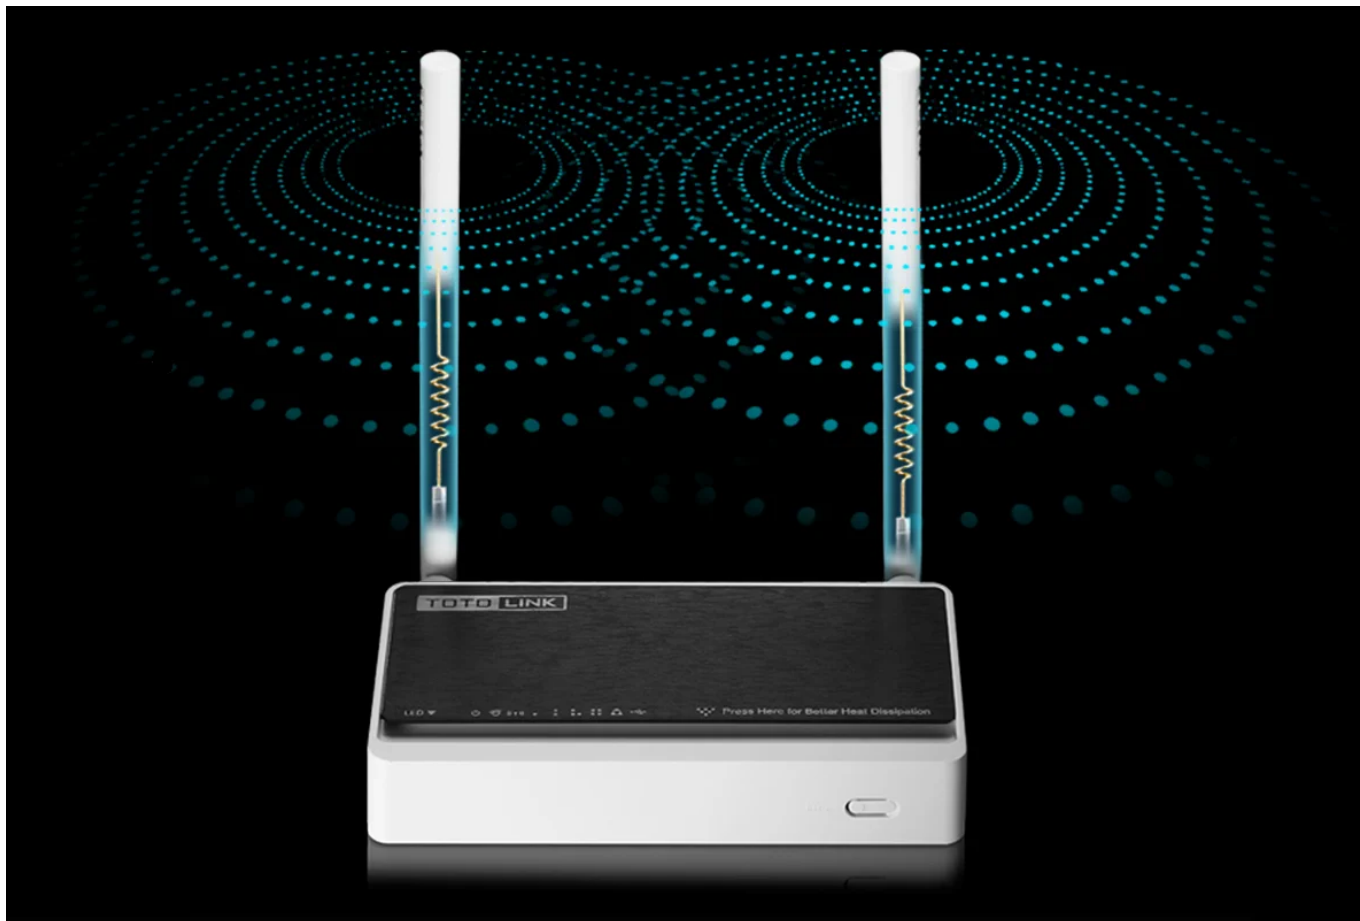

Totolink N300RT - cheap and good Wi-Fi router

The **Totolink N300RT 300 Mbps** is a cost-effective **802.11n-compliant** wireless router that can transfer data at speeds of **up to 300 Mbps**. The Totolink N300RT router has **two high-gain antennas** that provide a stable Wi-Fi signal and wide coverage. The Totolink router supports **advanced WPA/WPA2 encryption method**, which effectively prevents unauthorized access. **Excellent quality-price ratio** and software support are important arguments in favor of the presented product for all those users who are looking for a good, recommended router at an affordable price.

High-gain antennas

With two 2.4GHz high-gain antennas, the N300RT supports wireless signal transmission over longer distances, providing stable wireless connections without network delays.

IPTV function and parental control | Totolink N300RT router

The **IPTV** (Internet Protocol Television) function can be accessed through Easy Setup from a web browser. The Wi-Fi scheduler helps parents set up a schedule for network access, which helps protect children from uncontrolled Internet use by setting the appropriate time and time limit.

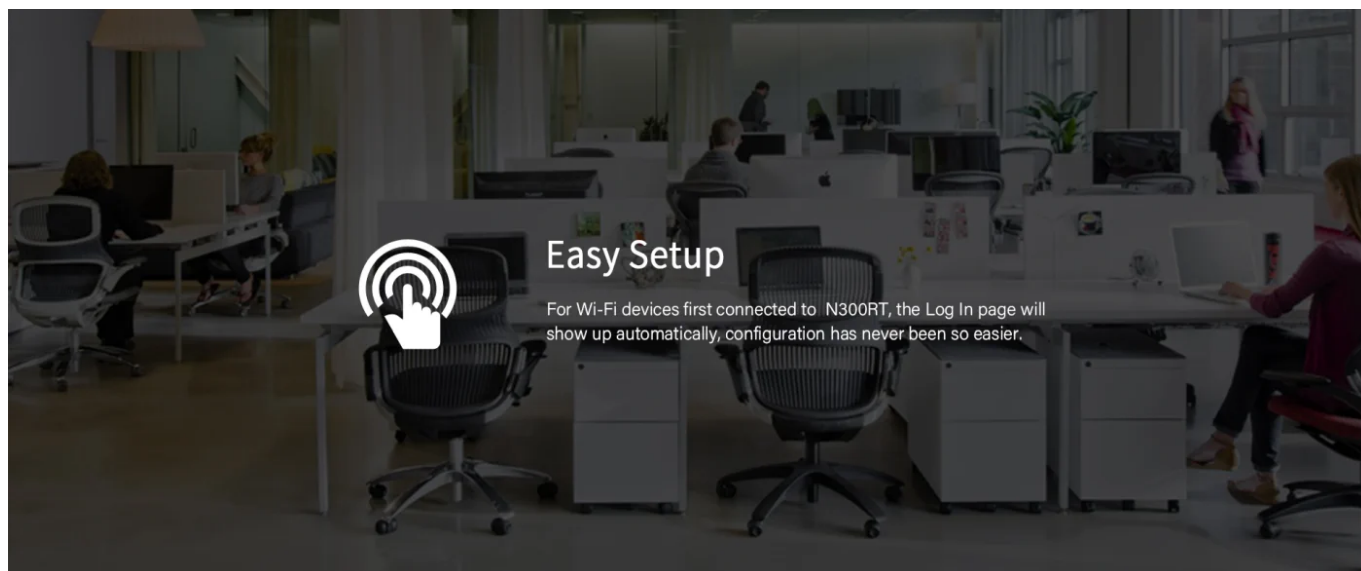

WPS button for easy connection to devices on the network

The N300RT is equipped with a WPS button on the chassis, which allows easy and secure connections to other devices without having to remember long passwords.

Easy to configure

For Wi-Fi devices connected to the N300RT for the first time, the login page will appear automatically, configuration has never been so easy.

Ability to create multiple networks

In addition to the default wireless SSID, you can add two more Wi-Fi networks for different purposes, such as guest, employee or manager use, to better control wireless access.

Multiple Networks Available

Except the default wireless SSID, you are allowed to add two more Wi-Fi networks for different purpose, such as guest use, staff use or manager use, better access control of wireless network.

Easy configuration via cell phone interface

Connect your cell phone to the router's Wi-Fi network. Open a browser on your phone and enter the router's IP address to log in to its configuration page. It only takes three steps to complete the quick setup using a wireless connection.

Easy Setup on the Cellphone UI
