Data transmission speed up to 300 Mbps

The N302R Plus wireless router is 802.11n compliant and provides Wi-Fi speeds of up to 300 Mbps, which meets network connectivity requirements and ensures the availability of services such as the Internet, online games and video.

Stable wireless connection

Long range Wi-Fi transmission is more stable with three high performance antennas, so the N302R Plus will provide wireless connectivity for all your home Wi-Fi devices, regardless of the shape and size of your home.

Easy installation

When you connect the device for the first time, the login page should start automatically. Using the Easy Setup page, you can configure the basic wireless network settings.

IPTV and QoS function

The router supports IPTV functions. Simply configure the IPTV settings to enjoy IPTV and fast wireless Internet at the same time. With QoS based on IP and MAC address, you can effectively manage bandwidth usage of individual devices.

Many wireless networks with access control

In addition to the default wireless SSID, you can add two more Wi-Fi networks for other purposes, such as a guest access control network.

Advanced Wi-Fi security

The N302R Plus supports the most advanced WPA/ WPA2-PSK encryption to ensure the security of your wireless connection and protect your Wi-Fi network from unauthorized users.

Parental control

The Wi-Fi schedule helps parents to control and manage their children's time online. The schedule lets you specify the days or times when your computer will have access to a wireless network.
