Full product description

Totolink T6 | WiFi Router | AC1200

The **Totolink T6** wireless dual-band router is specially designed to create a smart home Wi-Fi system. With 1200 Mbps dual-band Wi-Fi connection and one-click auto connect feature, the T6 router easily and efficiently provides Wi-Fi coverage even in large apartments, multiple floors, etc. The totolink ac1200 T6 router offers stable wireless network connection, wireless features and easy setup. In our store you will find access points, media converters, fiber splitters, fiber optic cables, copper cables, network cards, power strips, wired routers, extraction mounts, racks, lan accessories, sfp modules and other networking equipment.

Features:

- 867Mbps in the 5GHz band and 300Mbps in the 2.4GHz band for a total bandwidth of 1167Mbps simultaneously
- Complies with the latest IEEE 802.11ac Wi-Fi standards
- Wireless roaming helps users automatically switch to a stronger signal source
- Supports the ability to expand with additional devices to provide wide Wi-Fi coverage
- The main router supports MU-MIMO technology, which improves the Wi-Fi experience for users
- 1GHz core router processor provides high performance with low power consumption
- Intelligent beamforming helps to intensify the wireless signal and increases bandwidth
- Supports DHCP, static IP and broadband PPPoE functions
- Provides 64/128-bit WEP, WPA, WPA2 and WPA/WPA2 (TKIP AES) security
- QoS: Bandwidth control based on IP address
- Bright and white design with compact size
- Plug and play, no manual configuration required

Ensure connectivity of devices throughout the home.

T6 supports wireless roaming, other connected wireless devices automatically switch to a stronger signal source when you move, providing connectivity and seamless Wi-Fi experience in every corner of your home.

Ultra-fast Wi-Fi

Compliant with the latest 802.11ac standards, the T6 delivers wireless speeds of up to 1167Mbps, ideal for music, HD video and online gaming.

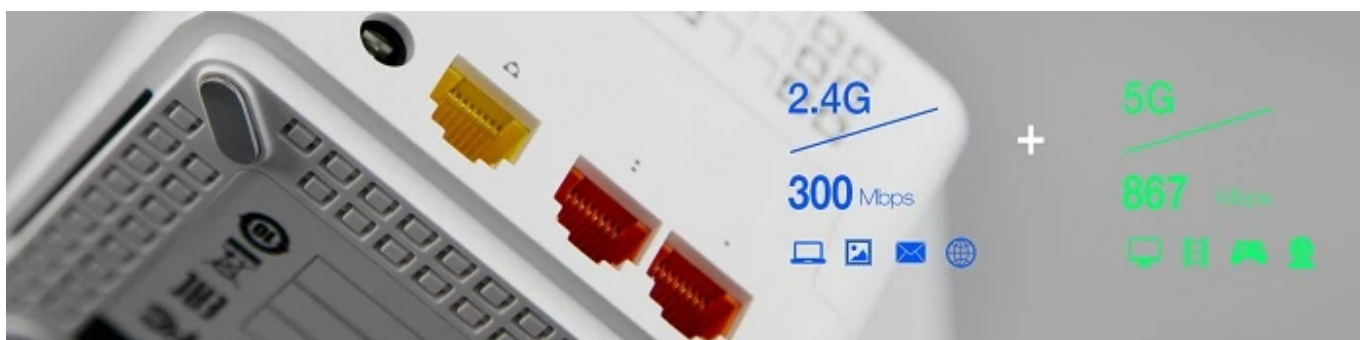

Plug and play

Factory default Mesh network pairing (one master one slave). No need to manually reconfigure, easy to use, simple layout.

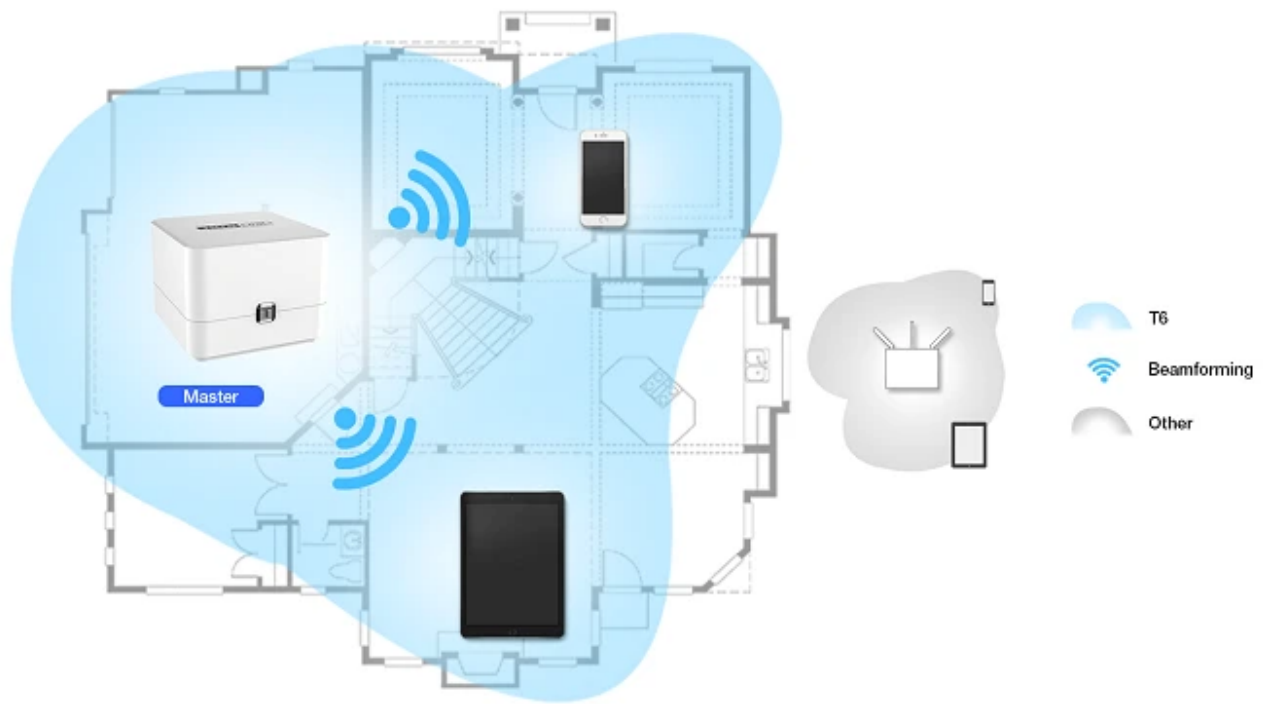

Simultaneous dual frequency range

Complying with the latest IEEE 802.11ac standards, the T6 provides dual-band wireless connectivity with speeds up to 1200Mbps, with 2.4G Wi-Fi exhibiting high compatibility and 5G Wi-Fi exhibiting low interference, ideal for lag-free gaming and large file downloads.

MU-MIMO and beamforming technology

With MU-MIMO technology, the T6 supports communication with multiple wireless devices simultaneously, improving the Wi-Fi experience for users. With Beamforming technology, the T6 intensively transmits wireless signals to connected wireless devices, improving bandwidth efficiency.

Multiple SSIDs for access control

You can create more than one SSID to provide your guests with secure Wi-Fi access that is easy to share on your home or office network.
