Full product description

Wi-Fi 6

The latest generation of Wi-Fi offers high speed, low latency and more simultaneous connections on a home network. Support for **4T4R** and **HE160** technology **in** the 5 GHz band provides connection speeds of up to 4.8 Gbps.

High speed for smooth transmission in 8K quality

Wi-Fi speeds of up to 5,400 Mbps allow simultaneous Internet browsing, video streaming and high-speed downloads.

Wide Wi-Fi coverage

Enjoy a stable Wi-Fi connection even in the kitchen and bedroom. **High-Power FEM technology, 6×Antennas, Beamforming and 4T4R structure** combine to tailor Wi-Fi coverage to your home and focus signal strength on your devices.

Qualcomm Next-Gen Processor

Equipped with Qualcomm's next-generation high-performance 64-bit processor, the **Archer AX72** processes data quickly and reduces network latency to ensure a robust and stable network.

Connections for 100 devices

The **Archer AX72** can easily support dozens of devices enjoying streaming or online gaming. **OFDMA** technologies - allows different devices to use a single stream for improved performance, and **MU-MIMO** - allows multiple devices to use multiple streams. Thus, it ensures the future usefulness of a home Wi-Fi network and allows multiple devices to connect simultaneously.

Does not heat up

Interlaced on the diagonal are rectangular elements that form the upper surface of the device's housing. **167 cm²** of this surface is used to ventilate the router, which consequently improves heat dissipation and allows the device to work efficiently.

TP-Link HomeShield

HomeShield protects all connected devices from DDoS attacks, malicious websites and port-level intrusions, ensuring the security and privacy of personal data.
