Full product description

Wi-Fi 6

The latest generation of Wi-Fi offers high speed, low latency and more simultaneous connections on a home network. Support for **4T4R** and **HE160** technology in the 5 GHz band provides connection speeds of up to 4.8 Gbps.

High speed for smooth transmission in 8K quality

Wi-Fi speeds of up to 5,400 Mbps allow simultaneous Internet browsing, video streaming and high-speed downloads.

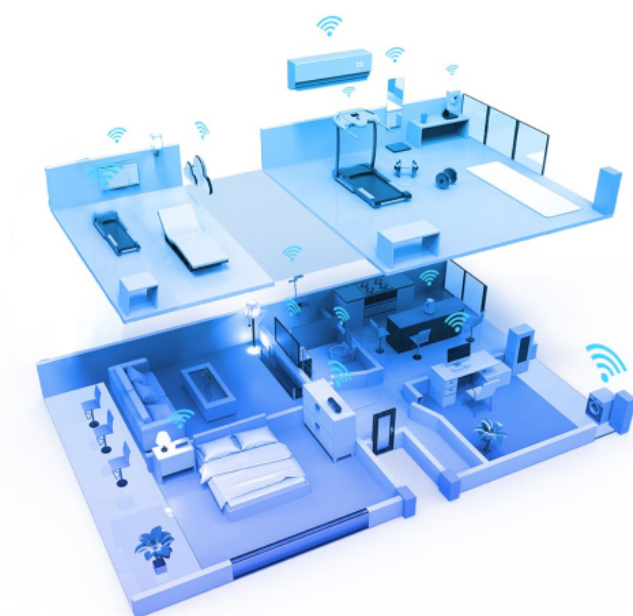

Wide Wi-Fi coverage

The Archer AX73 will provide a stable connection throughout your home. With a powerful FEM chip, six antennas, Beamforming and 4T4R technology, Wi-Fi coverage is sufficient for all devices.

Connections for 200 devices

The **Archer AX73** can easily support dozens of devices using broadcasting or online gaming. **OFDMA** technologies - allows different devices to use a single stream for improved performance, and **MU-MIMO** - allows multiple devices to use multiple streams. Thus, it ensures the future usefulness of a home Wi-Fi network and allows multiple devices to connect simultaneously.

Does not heat up

The top panel of the chassis has an ingenious, modern design and consists of multiple holes that improve heat distribution and allow the router to operate at full power.

TP-Link HomeShield

HomeShield protects all connected devices from DDoS attacks, malicious websites and port-level intrusions, ensuring the security and privacy of personal data.
