Full product description

Gigabit router operating in two frequency bands

The **Archer C1200 Router** supports a new generation of connections based on the **802.11ac** standard. This solution gives you the ability to use a connection in the **2.4 GHz** band with a speed of 300 Mbps for everyday, less demanding applications such as email or web browsing, while at the same time the **5 GHz** band with a speed of 867 Mbps for the most demanding applications such as online gaming or Full HD video streaming.

Wide range wireless network

Three external antennas of high technological quality allow to maintain high speeds over longer distances, guaranteeing wide range and stable and reliable wireless network in every corner of the house or office.

Gigabit ports and universal USB port

With 4 Ethernet ports, the Archer C1200 offers fast and stable connections for all wired devices, including game consoles, Smart TVs, digital PVRs, etc. With the multifunctional USB 2.0 port, users can share files, media and printers with devices on their local network, and with the FTP server function, also over the Internet.

Simple configuration via application

The Tether app allows you to easily and remotely manage your network using your Android or iOS device.
