Full product description

TP-Link Archer AC2300 dual-band wireless Gigabit router

TP-Link Archer C2300 is a wireless gigabit router. This router offers much more than just faster Wi-Fi. Thanks to **MU-MIMO** technology we can connect to three devices simultaneously. The speed of the router is excellent - it provides speeds up to 1625 Mbps in the 5 GHz band and up to 600 Mbps in the 2.4 GHz band. Auxiliary processor supports maintaining speed quality on all devices connected to Archer. You can easily watch movies, play games, stream and share large files. Wondering, **what gigabit router to choose?** Archer's parameters confirm that it's a good choice.

4k streaming and online games simultaneously

Using **NitroQAM** technology, the Archer C2300 is able to reach speeds up to **1625 Mb/s** in the **5 GHz** band and up to **600 Mb/s** in the **2.4 GHz** band, so it can handle **online gaming**, **watching 4k** movies without any problems. or with **sharing large files**.

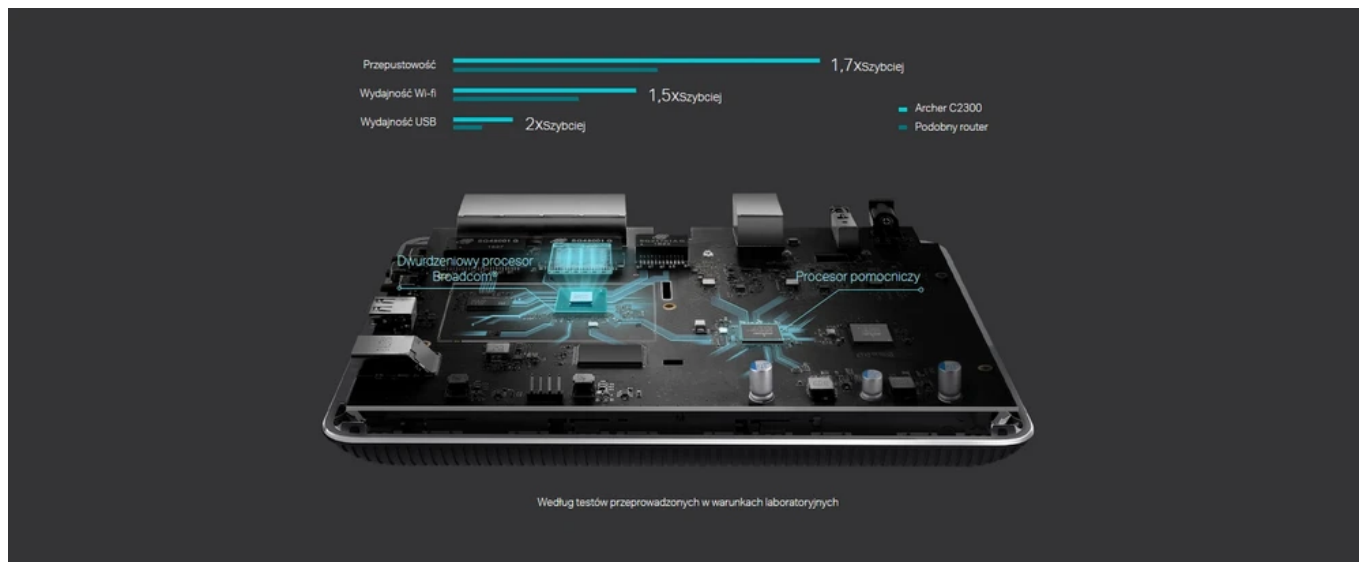

Amazing speeds in your home

Thanks to the speeds achieved by the ARCHER C2300 we can **watch movies with friends** stress-free or **play games with family**.

1.8 GHz CPU with auxiliary processor

The **Broadcom®** dual-core processor, with **1.8 GHz** clocking, provides **the highest** speed, bandwidth and transmission performance on multiple devices simultaneously.

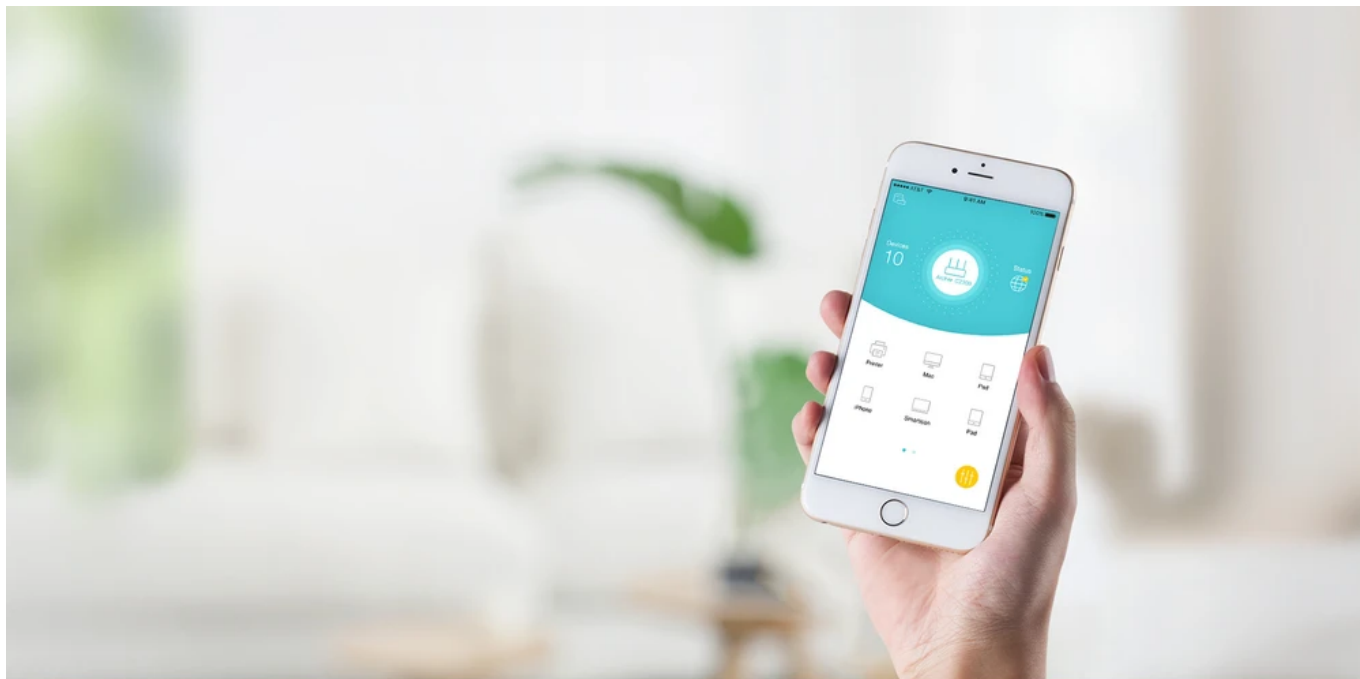

The Internet throughout the house

Powerful external antennas and high power transmitter allow the router to create stable wireless network with long range. Whereas **Range Boost** technology further increases the range of the connection.

Convenient configuration and intuitive interface

The intuitive interface, available in many languages, allows for quick and easy router configuration. You can also configure it on your smartphone by downloading the **TP-LINK Tether** application, which is available on devices with [iOS](#) and [Android](#).

MU-MIMO dual-band wireless gigabit router, AC2300

- Total wireless speed 2.25 Gb/s in the 2.4 GHz and 5 GHz bands
- Powerful processor - 1.8 GHz dual-core CPU for fast and stable router operation
- Multiple stable connections - MU-MIMO technology increases performance three times over, communicating with three devices simultaneously
- Accelerate your Wi-Fi - NitroQAMTM technology provides maximum Wi-Fi speeds in all bands
- Better performance - Smart Connect automatically selects the best bandwidth for each device
- Secure VPN connections - OpenVPN and VPN PPTP support together with VPN Acceleration technology provide convenience and security
