Full product description

AC750 Dual-Band Wireless Router

Enjoy stable and fast Internet access in every corner of your home. Archer C24 router operates in two bands - 2.4GHz band providing data transfer speeds of up to 300MB/s and 5GHz band supporting speeds of up to 433MB/s. Four external antennas ensure perfect coverage. Additionally, apart from router function, the device can also be used as an access point.

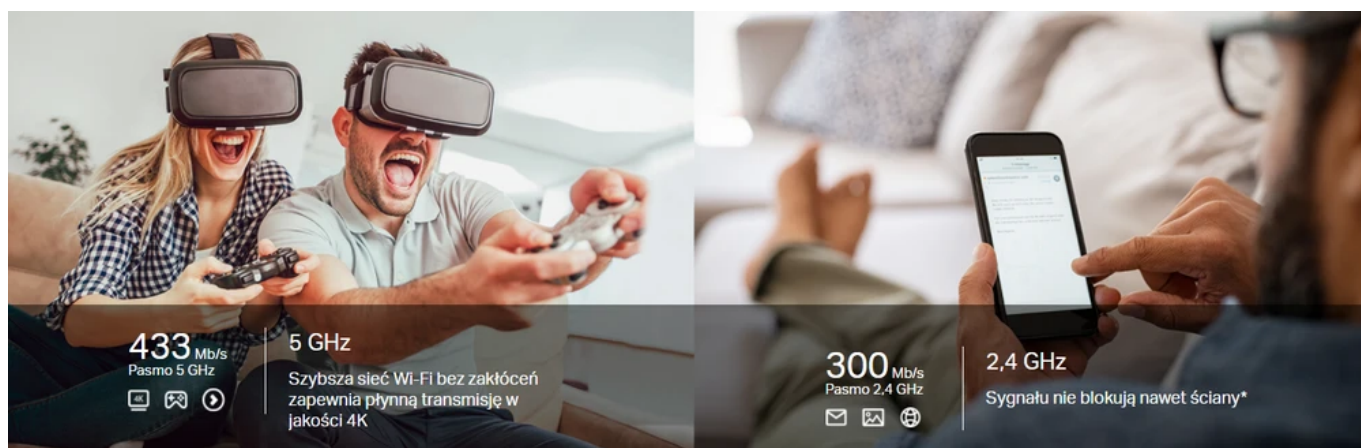

Special features

- Easy setup and management via Tether mobile app
- Can be mounted vertically
- Dual-band operation for speeds up to 733 Mbps
- 4 external antennas provide excellent coverage for the entire household
- IPTV support

Dual band for double the bandwidth

The router is ideal for work and play. The lower 2.4GHz band at 300 Mbps is used for normal Internet browsing and mail handling. For more demanding operations such as playing online games or streaming high definition video, Archer C24 uses the 5GHz band at 433 Mbps.

Perfect coverage

Forget about dead zones! With four external antennas, Archer C42 covers more directions and provides broad WiFi coverage for the entire home. Say goodbye to slow loading pages and long downloading of your favorite content!

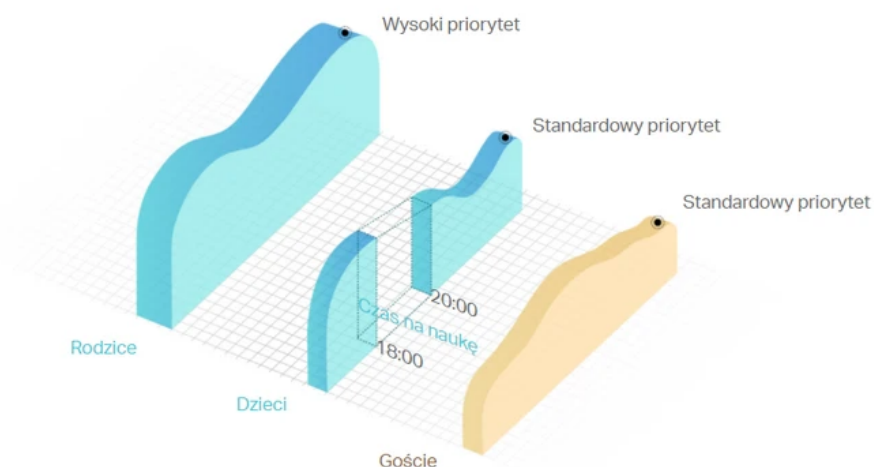

Universal administration

Nowadays, protecting children online is a priority, so Archer C24 offers advanced management options such as parental control, QoS with device prioritization, and network settings for guests with different passwords. All of this ensures that your home network is protected and safe from uninvited guests.
