Full product description

Two Wi-Fi bands

The dual-band Archer C64 allows you to connect more devices: the 2.4 GHz band provides reliable connectivity for email, web browsing and other simple tasks, while the 5 GHz band is better suited for multimedia tasks such as video streaming or online gaming

A new level of security

WPA3 is the latest protocol to enhance the security of personal Wi-Fi networks. Stronger encryption of Wi-Fi passwords and protection against brute-force attacks will ensure complete security of your home Wi-Fi network.

Wi-Fi network throughout the house

With four powerful external antennas, the **Archer C64** will provide Wi-Fi signals throughout the home, while **Beamforming technology** will improve signal quality for distant devices by identifying their location and focusing the signal in their direction.

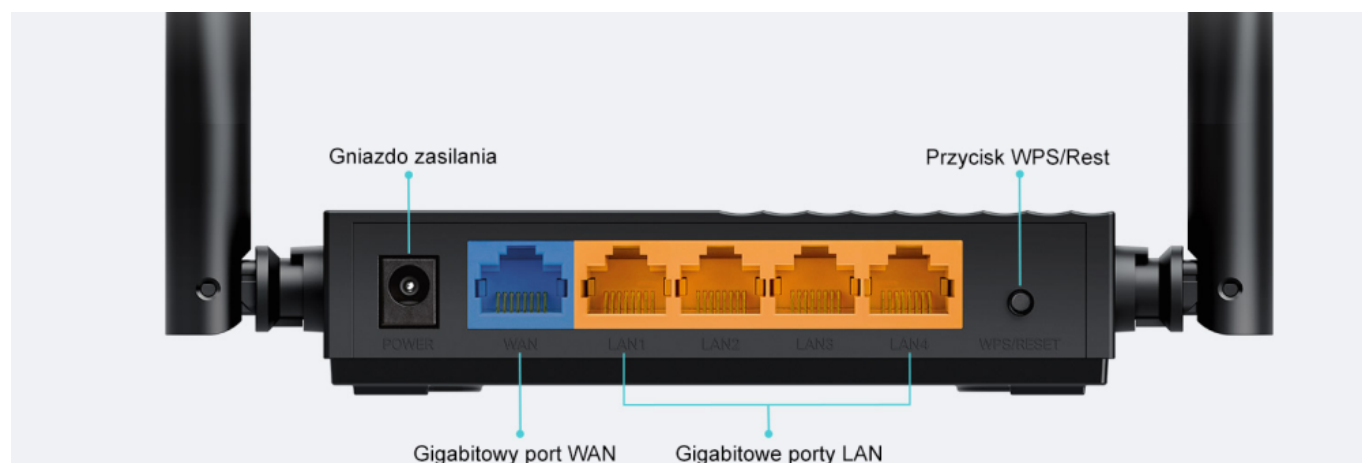

Cooperation with several devices simultaneously

Wi-Fi speeds of up to 1,200 Mbps with 802.11ac combined with MU-MIMO technology provide reliable, high-speed connectivity to multiple devices and eliminate latency.

10 times faster

Gigabit Ethernet ports (1 WAN port 4 LAN ports) offer up to ten times the speed of the Fast Ethernet standard, providing fast and reliable connections to computers, Smart TVs and gaming consoles.

Access point mode

Switch the **Archer C64** to access point mode to convert an existing wired network into a wireless network.

Simple configuration

Set up your **Archer C64** device in minutes using a clear web interface and the handy Tether app, which also lets you manage network settings from any Android or iOS device.
