Price: **462.27 zł** gross / 375.83 zł net

Manufacturer: TP-LINK

Referention number: DNXGFNLMGRMMIQ

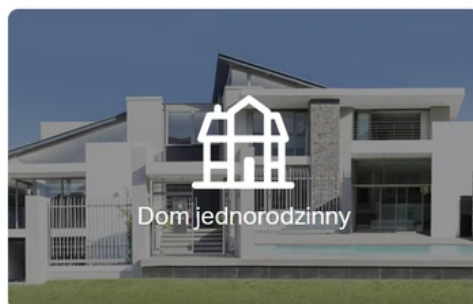

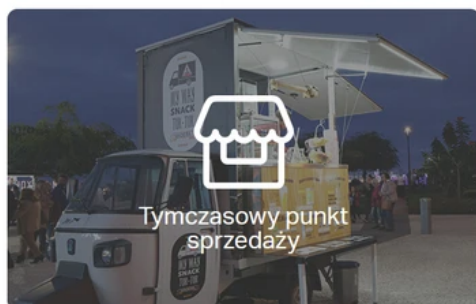

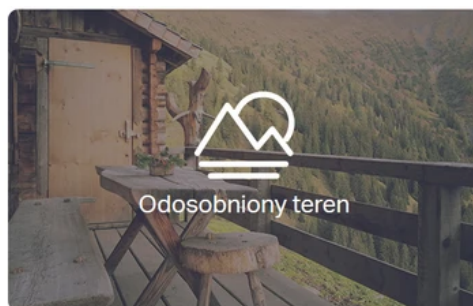

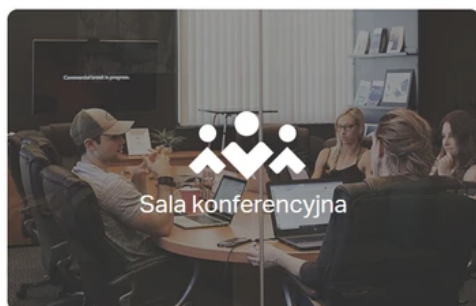

Product features

Height	33.5 mm
Output voltage	12 V
Width	174 mm
Depth	124.5 mm
Package weight	670 g
Package depth	223 mm
Package height	70 mm
Package width	307 mm
Output current	1.5 A
WLAN data transfer rate (first band)	450 Mb/s
WLAN data transfer rate (second band)	867 Mb/s
WLAN data transfer rate (max)	867 Mb/s

Full product description

TP-Link Archer MR400 - advanced wireless router

TP-Link Archer MR200 is a 4G wireless router. It offers unprecedented comfort of use and multifunctionality. It is an advanced **wireless router** for work, entertainment or rest - just plug the device into the power supply, insert the SIM card and enjoy the Internet access anywhere in the world. The LAN ports can also be used to share the Internet connection with wired devices such as desktops. If you're wondering what advanced router for home or work you should buy, the answer is simple - Archer MR400!

4G LTE network throughout the house. Do you have a SIM card? You don't need anything else!

Connecting to fast, stable 4G LTE Wi-Fi has never been so easy! With the integrated 4G LTE modem and SIM card slot, you simply insert the SIM card and turn on the device.

Share your 4G LTE network

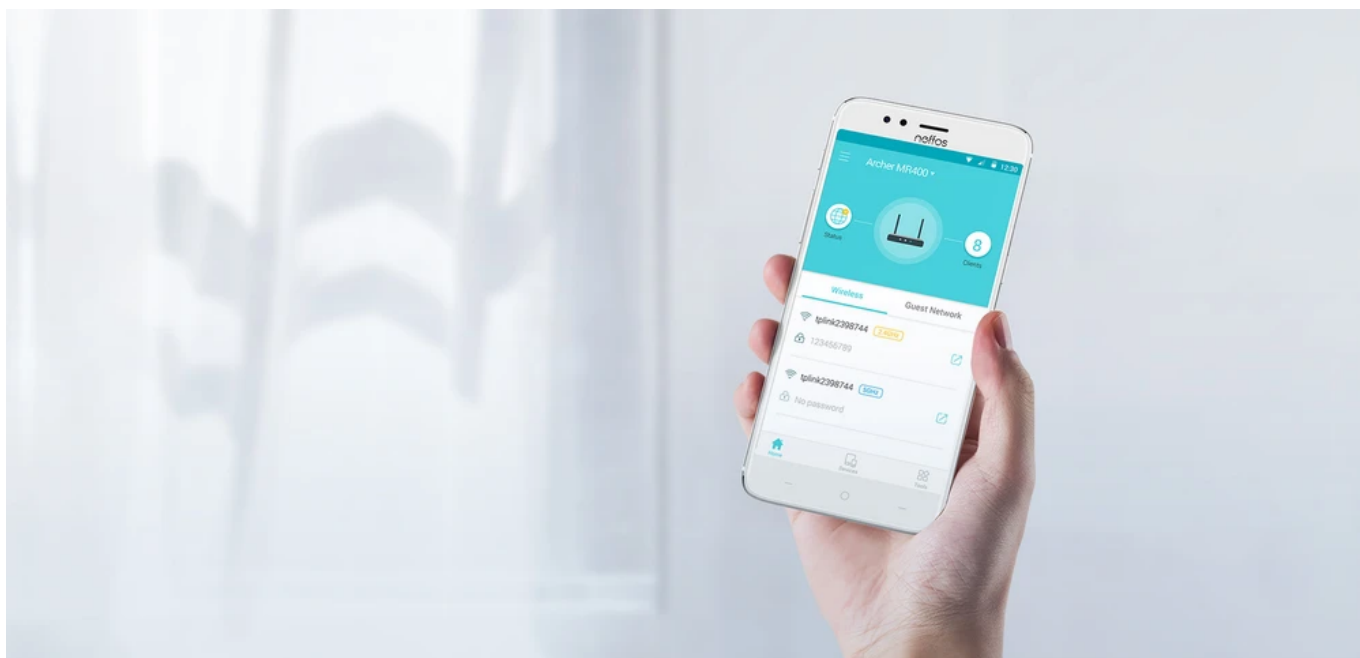

Router Archer MR400 allows you to share your network with up to 64 wireless devices, including tablets, laptops and smartphones. Enjoy movie watching, fast file downloads and video chat without any hindrance!

Easy management from a website or application

Full configuration only takes a few minutes. Just use the device management page. You can also configure on your smartphone with [Android](#) or [iOS](#) systems by downloading the intuitive TP-LINK Tether application.

Dual-band 4G LTE wireless router TP-Link Archer MR400

- Modern 4G network - share Internet connection with up to 64 Wi-Fi devices at the same time and download files at speeds up to 150 Mbps
- AC1200 wireless network - two Wi-Fi bands offering 300 Mbps in the 2.4 GHz band and 867 Mbps in the 5 GHz band
- Plug and play - insert the SIM card and use the device, no configuration is needed
- Two LTE unscrewed antennas - for stable and efficient connections
- Wi-Fi router mode - connect the Ethernet cable to a LAN/WAN port and use wired connections if you do not have access to a 4G network
