Width	100.53 mm
Depth	36.6 mm
Maximum data transfer rate	1300 Mb/s
Package weight	420 g
Package depth	148 mm
Package height	85 mm
Package width	207 mm

Full product description

High gain wireless USB adapter

TP-Link Archer T9UH is a wireless USB adapter reaching speeds up to **1900 Mb/s** in the **5 GHz** and **2.4 GHz** bands. The device is equipped with a high quality antenna, which significantly increases the quality and stability of connections, and beam shaping technology enables reliable wireless connections. The network card uses a **USB 3.0** port, which is 10 times faster than its predecessor, i.e. **USB 2.0**.

AC1900 high-speed connections

Archer T9UH makes sure your computer gets the most out of your Internet connection, and with **AC1900** you can enjoy connections 3 times faster than the N standard.

Two transmission bands

The 5 GHz band is ideal for streaming HD video or online games, and the traditional **2.4 GHz** band is ideal for everyday, less demanding applications such as email or web browsing.

Wide network coverage

Thanks to four high-gain antennas, Archer T9UH allows to create stable wireless connection regardless of the position of the router. The device works with most operating systems, including Windows XP/7/8/8.1/10, OS X (10.7-10.10) and Linux.
