Full product description

Wireless VDSL/ADSL Router/Modem, MU-MIMO, AC2100

The TP-Link Archer VR2100 wireless router is a great choice for any home. The device offers state-of-the-art **Super VDSL** technology that delivers more than three times the download speeds of the previous generation. Dual-band operation allows you to power connected wireless devices with Internet speeds of up to **300 + 1733 Mbps**. On the back of the router you will find Gigabit LAN ports and USB 3.0 ports where you can connect an external drive and create your own home multimedia center.

Super VDSL - the future of internet access

The Archer VR2100 is equipped with Super VDSL (VDSL2 Profile 35b), the latest generation of DSL technology. With this, download speeds are increased to **350 MB/s**, this is 3 times faster than its VDSL2 predecessor. The integrated DSL port also supports all standard DSL connections.

Enjoy your network at full speed

The Archer VR2100 takes full advantage of its dual-band Wi-Fi capabilities, **achieving speeds of up to 1733 Mbps in the 5 GHz band and 300 Mbps in the 2.4 GHz band**. Enjoy combined speeds of up to 2.1 GB/s to fully eliminate latency for HD movies and online gaming.

4x4 MU-MIMO for high performance Wi-Fi on any device

MU-MIMO technology supports up to four devices simultaneously, reducing wait times and increasing Wi-Fi bandwidth and performance for each device.

Easy setup and management

Configure the **Archer VR2100 in minutes with an intuitive web interface and the powerful Tether app**. Manage network settings, including parental control and access control from any Android or iOS device. Tether also provides automatic firmware updates to ensure your network always has the latest performance and security.
