Full product description

Archer VR600 AC1600: the gigabit router for your home

Archer VR600 AC1600 is a **VDSL/ADSL** wireless router that provides many connection possibilities. **The EWAN port, USB** port and full compatibility with **VDSL2/ADSL2+/ADSL2/ADSL** standards allow you to freely choose the best available Internet provider. Thanks to a powerful transmitter and 3 dual-band antennas we are guaranteed one of the best ranges on the market and great stability of the wireless network. **The ARCHER VR600** Wireless router, operating on dual-band antennas, provides speeds reaching **1300Mbps** in the **5GHz** band, and **300Mbps** in the **2.4GHz** band. The beam shaping technology ensures high stability of connections, while the **TP-Link Tether** application will enable easy access to the router and quick configuration.

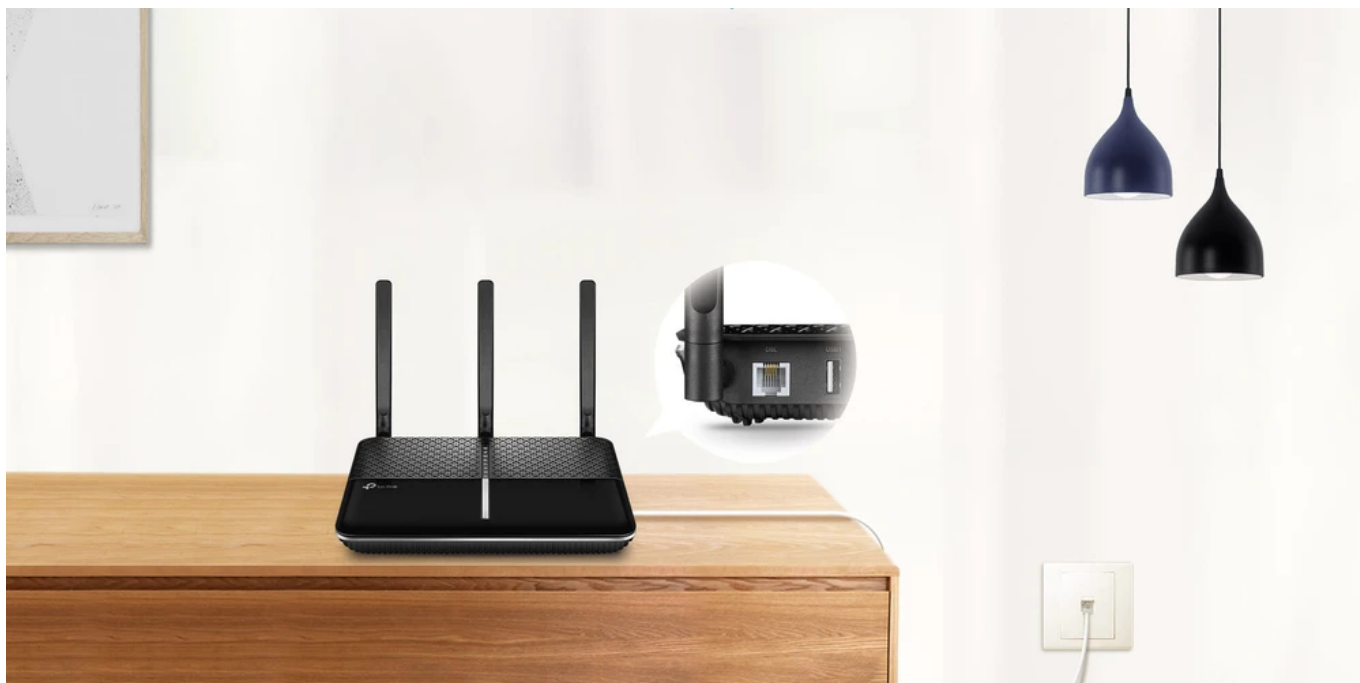

High-speed WiFi - up to 1.6GB/sec.

Unlocking the full potential of its internet connection, the Archer VR600 allows you to reach speeds up to **1.6Gb/s**, so it's perfect for **online games** or **HD video streaming**. Thanks to the technology used in the router, it allows to operate more devices and reduce interference to a minimum.

High-speed VDSL connection

Using the latest **VDSL2** technology, the Archer VR600 router allows you to achieve great **VDSL** speeds up to **100Mb/s**, almost 5 times higher than the standard **ADSL2+**. Archer VR600 combines the functionality of two devices in one, it can work as a **VDSL** router or a regular **wireless** router. VDSL port supports all available standards: **VDSL2**, **ADSL2+**, **ADSL2**, and **ADSL**.

Usb port supporting 3G/4G modem

The Archer VR600 has a **VDSL** modem, EWAN port and USB ports that support **3G/4G** modems, so the router does not limit your ability to choose the best Internet provider and change it if necessary.

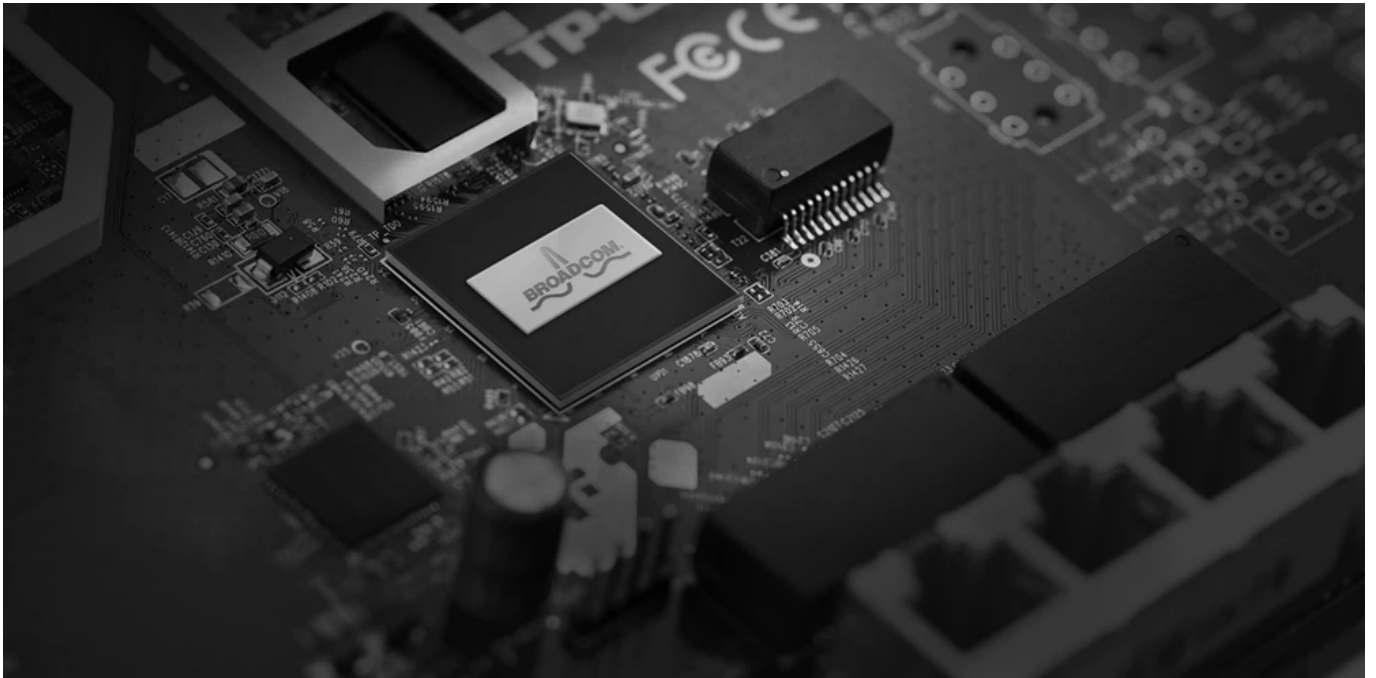

Wide range and stable connection

Using **three external antennas**, the **Archer VR600** wireless router provides a stable connection anywhere in your home. Thanks to the advanced beam shaping technology, the device delivers a signal with high precision, accelerating the operation of WiFi networks.

Super fast processor

Archer VR600 is equipped with **processor from Broadcom**, the world's leading manufacturer of components for **DLS** devices. Thanks to this solution, the router is compatible with the vast majority of modems, so you don't have to waste time looking for the right modem.

Easy to set up

A few minutes - that's how long it takes to configure the Archer router using an intuitive browser interface and **TP-Link Tether** application. The application allows you to manage hardware through devices with [Android](#) or [iOS](#).
