Full product description

Gigabit router - no more buffering

TP-Link Archer VR900 is a wireless **router/modem VDSL/ADSL** reaching **1900Mbps** in two bands - **1300Mbps** in the **5GHz** band and **600M** in the **2.4GHz** band. The device has many connection possibilities and allows you to freely choose the best available Internet provider. A powerful transmitter and 3 dual-band antennas provide the best range, and the beam shaping technology guarantees high stability of connections.

1.9Gb/s wireless network speed

Archer VR900 uses the full potential of **VDSL** connections and achieves a total wireless network speed of up to **1900Mbps**, and thanks to the use of two wireless networks, interference is significantly lower.

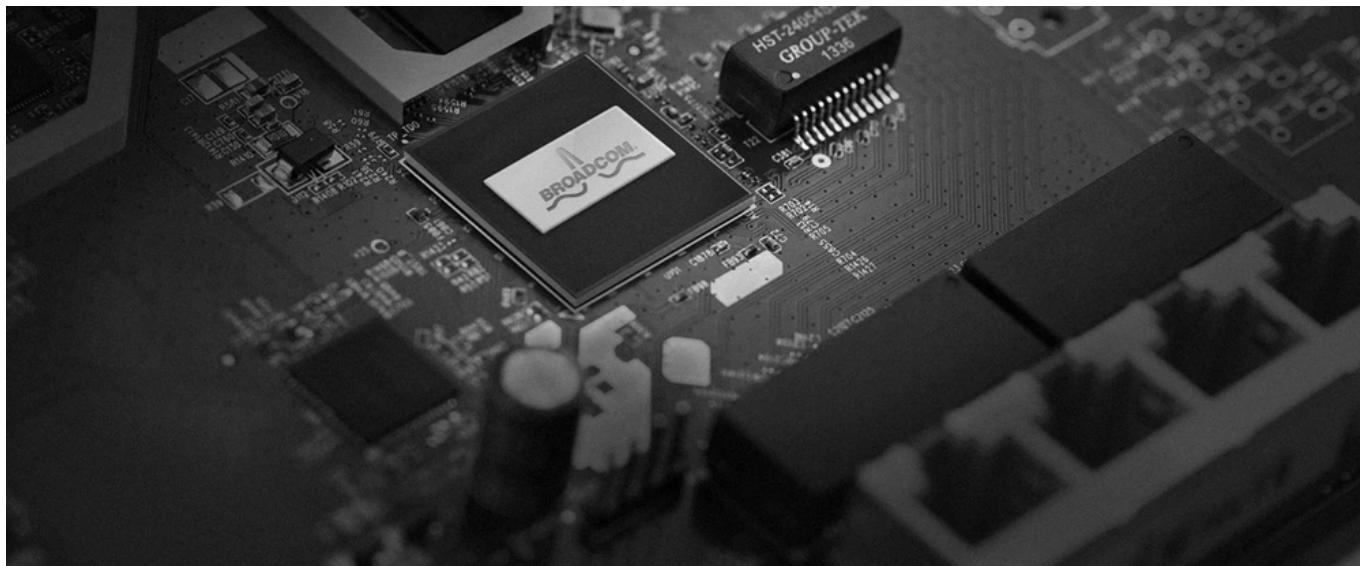

VDSL broadband

The Archer VR900 is a modem and router in one, and VDSL technology provides almost 5 times the speed of the ADSL2+. In addition, the router is compatible with all DSL standards: VDSL2, ADSL2+, ADSL2 and ADSL.

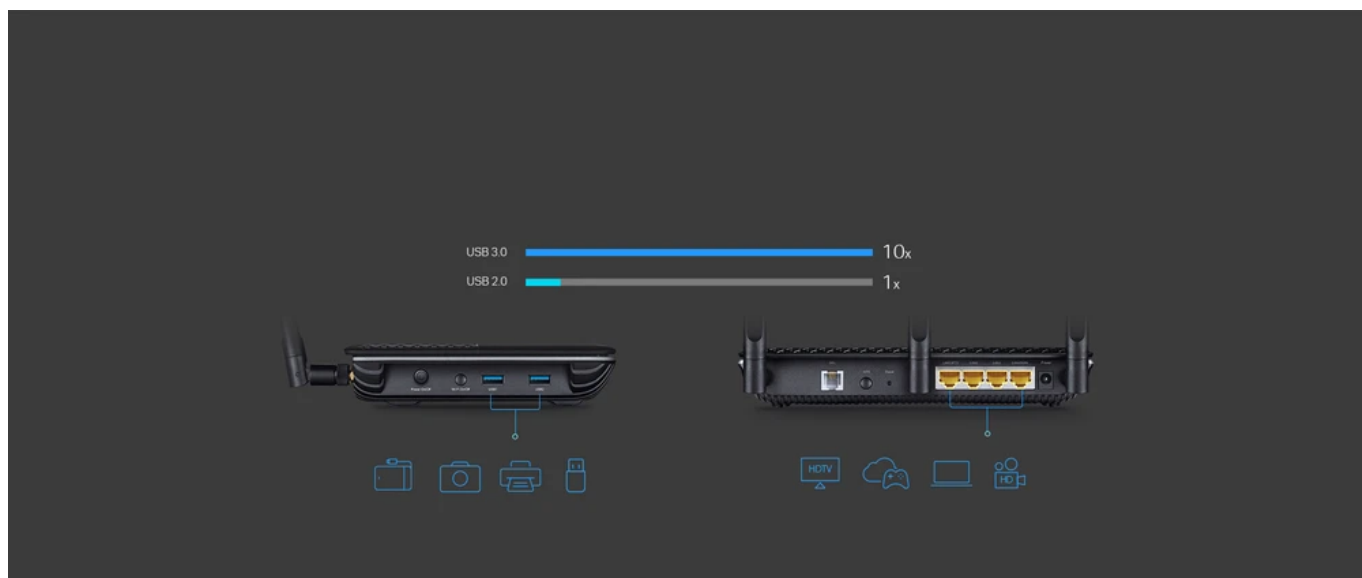

Efficient processor

Fast, dual-core **Broadcom 1GHz** processor ensures continuous and efficient handling of multiple wired and wireless connections at the same time, allowing you to use the full speed potential of the router.

Gigabit wired network

Using the **USB 3.0** and **USB 2.0** device ports, users can share printers, data and media with devices on their home network and, using FTP server functions, over the Internet. With four Gigabit Ethernet ports, the Archer VR900 is the ideal choice for applications requiring a stable, high-speed connection such as online gaming or streaming HD video.

Elegant design

The elegant design makes the Archer VR900 fit into any interior. Its soft curves and top quality materials retain style without compromising on performance.

Easy to set up

Now you can configure your router in a few minutes with an intuitive interface in your browser and **Tether** applications.
