Price: **321.33 zł** gross / 261.24 zł net

Manufacturer: TP-LINK

Referention number: DNXGFOOOKRMNGP

Product features

Regulatory Approvals	FCC, IC, NCC, BSMI, IDA,RCM, JPA, JRF, VCCI, KC
Storage relative humidity (H-H)	5 - 90%
Product type	Mesh system
Height	190 mm
Antenna type	Internal
LED indicators	LAN
Firewall security	SPI Firewall
Width	90.7 mm
Depth	90.7 mm
Security algorithms	WPA2-PSK
BeamForming	Yes
Storage temperature (T-T)	-40 - 70 °C
Compliance certificates	CE
Package weight	1730 g
Humidity measurement range	10 - 90%
Harmonized System (HS) code	85171800
Dynamic IP	Yes
Networking standards	IEEE 802.11a
Ethernet LAN (RJ-45) ports	2
Ethernet cable	Yes
DC-in jack	Yes
Operating temperature (T-T)	0 - 40 °C

Package depth	241 mm
Package height	105 mm
AC adapter included	Yes
Package width	365 mm
Quality of Service (QoS) support	Yes
Static IP	Yes
Reset button	Yes
Dynamic DNS (DDNS)	Yes
Number of guest networks (2.4 GHz)	1
Number of guest networks (5 GHz)	1
AC adapter input current	0.3 A
Wi-Fi band	Dual-band (2.4 GHz / 5 GHz)
Parental control	Yes
Wi-Fi standards	802.11a
AC input frequency	50 Hz
AC input voltage	100 V
Top Wi-Fi standard	Wi-Fi 5 (802.11ac)
AC adapter output current	0.85 A
Antennas quantity	2
AC adapter output voltage	9 V
Product colour	Grey
Guest access	Yes
WLAN data transfer rate (first band)	300 Mb/s
WLAN data transfer rate (second band)	867 Mb/s
Port forwarding	Yes
WLAN data transfer rate (max)	1167 Mb/s
DHCP client	Yes
DHCP server	Yes
Sustainability compliance	Yes

Full product description

Deco E4 - Dual band Mesh Wi-Fi to your home

Deco is the easiest way to guarantee a strong Wi-Fi signal in every corner of your home. This system will provide you with a fast and stable WiFi connection for all your devices in any room of the house. If you're tired of delays in downloading files or losing your Internet connection, Deco E4 will provide you with a simple but sophisticated way to get Wi-Fi coverage without any problems. **This home mesh system supports wireless speeds up to three times faster than previous generation routers and can support up to 100 Wi-Fi devices.** The Deco units work together as one unified network, so you can enjoy higher speeds throughout your home without having to jump between networks.

Eliminate weak signal areas once and for all

A system of two units can cover an area of up to 260 m². It doesn't matter what your house is. Enjoy uninterrupted connections no matter where you are in the house. And if you need more, just add another Deco router to your network.

Forget about the long caching!

The MESH system has a significant advantage - devices automatically connect to the fastest Deco unit in your home. Move freely around the house and always have the perfect signal. Your terminal device will connect to your Deco router, which at any given moment sends the best WIFI signal. This ensures that no matter where you are at home, you will always enjoy an uninterrupted high speed internet connection. Whether you operate in the 2.4 GHz or 5 GHz band, the system will always select the correct frequency on your device.

Three times the network speed

Deco E4 offers up to three times the network speed of the previous generation of routers, using **802.11ac** technology and two bands to work. **In the 5 GHz band it reaches 867 Mbps, in the 2.4 GHz band - 300 Mbps.** The unit can connect up to 100 devices without speed limit. This solution ensures smooth gaming and video playback in 4K.

Wi-Fi Mesh system easy to configure and expand

Installation of TP-Link Deco E4 Mesh system is very simple. **Just install the TP-Link Deco application and carefully follow the instructions displayed on the screen.** After a few minutes your network will be up and running. You can also add more Deco units via the application to extend your range. **You can extend the range of your Mesh WiFi network at any time - just connect another Deco router.**
