Price: **472.41 zł** gross / 384.07 zł net

Manufacturer: TP-LINK

Referention number: DNXGGHIQKRMKMK

Product features

Regulatory Approvals	FCC, IC, NCC, BSMI, IDA,RCM, JPA, JRF, VCCI, KC
Storage relative humidity (H-H)	5 - 90%
Product type	Mesh system
Height	190 mm
Antenna type	Internal
LED indicators	LAN
Firewall security	SPI Firewall
Width	90.7 mm
Depth	90.7 mm
Security algorithms	WPA2-PSK
BeamForming	Yes
Storage temperature (T-T)	-40 - 70 °C
Compliance certificates	CE
Package weight	1740 g
Humidity measurement range	10 - 90%
Harmonized System (HS) code	85171800
Dynamic IP	Yes
Networking standards	IEEE 802.11a
Ethernet LAN (RJ-45) ports	2
Ethernet cable	Yes
DC-in jack	Yes
Operating temperature (T-T)	0 - 40 °C

Package depth	235 mm
Package height	160 mm
AC adapter included	Yes
Package width	353 mm
Quality of Service (QoS) support	Yes
Static IP	Yes
Reset button	Yes
Dynamic DNS (DDNS)	Yes
Number of guest networks (2.4 GHz)	1
Number of guest networks (5 GHz)	1
AC adapter input current	0.3 A
Wi-Fi band	Dual-band (2.4 GHz / 5 GHz)
Parental control	Yes
Wi-Fi standards	802.11a
AC input frequency	50 Hz
AC input voltage	100 V
Top Wi-Fi standard	Wi-Fi 5 (802.11ac)
AC adapter output current	0.85 A
Antennas quantity	2
AC adapter output voltage	9 V
Product colour	Grey
Guest access	Yes
WLAN data transfer rate (first band)	300 Mb/s
WLAN data transfer rate (second band)	867 Mb/s
Port forwarding	Yes
WLAN data transfer rate (max)	1167 Mb/s
DHCP client	Yes
DHCP server	Yes
Sustainability compliance	Yes

Full product description

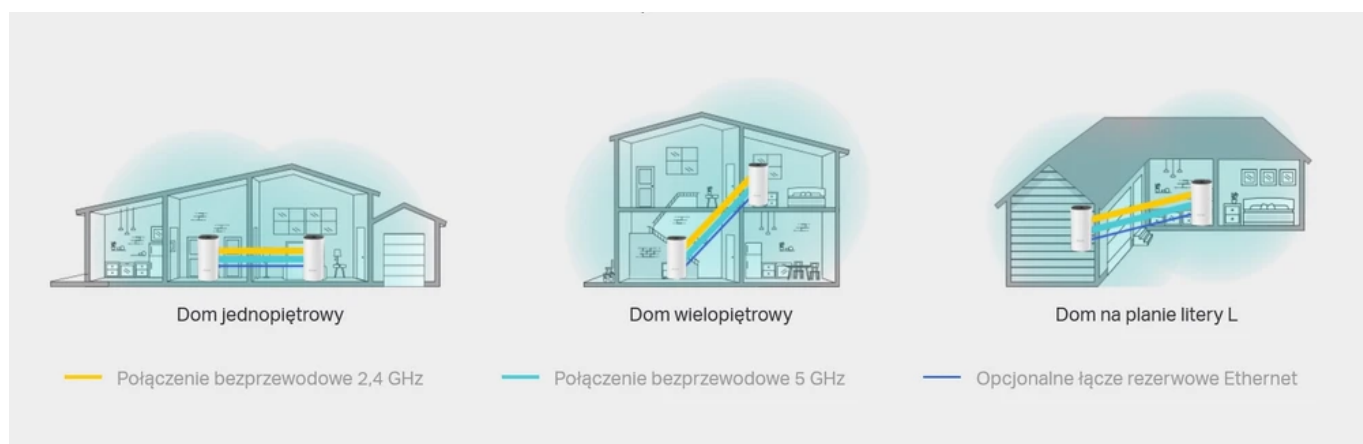

Deco E4 - Dual-band Wi-Fi Mesh System for Your Home

Deco is the easiest way to guarantee a strong Wi-Fi signal in every corner of your home. This system will provide you with a fast and stable WiFi connection for a whole host of devices in any room of the house. If you're tired of lagging downloads or losing your internet connection, Deco E4 will provide you with a simple yet sophisticated way to get seamless Wi-Fi coverage. **This home mesh system supports wireless speeds up to three times faster than previous generation routers and can support up to 100 Wi-Fi devices.** The Deco units work together as one unified network, so you can enjoy faster speeds throughout your home without having to jump between networks.

Eliminate weak signal areas once and for all

The two-unit system can cover an area of up to 260 m². It doesn't matter what your home is like. Enjoy uninterrupted connections no matter which part of the house you're in. And if you need more, simply add another Deco router to your network.

Move freely around your house!

The MESH system has a significant advantage - the devices automatically connect to the fastest Deco unit in your home. Move freely around your home and always have a perfect signal. Your end device will connect to the Deco router that is currently sending the best WIFI signal. This ensures that no matter where you are in the house, you will always enjoy an uninterrupted high-speed internet connection. Whether you are operating in the 2.4 GHz or 5 GHz band, the system will always select the correct frequency on your device.

Triple the network speed

The Deco E4 offers network speeds up to three times faster than the previous generation of routers by using **802.11ac** technology and two bands for operation. **In the 5 GHz band it reaches speeds of 867 Mbps, in the 2.4 GHz band it is 300 Mbps.** Up to 100 devices can be connected to the unit without speed limit. Such a solution ensures smooth gaming and video playback in 4K.

Wi-Fi Mesh System easy to configure for expansion

Installing the TP-Link Deco E4 Mesh system is very simple. **Just install the TP-Link Deco application and carefully follow the on-screen instructions.** After a few minutes, your network will be up and running. You can also add more Deco units through the app to extend your coverage. **You can extend the range of your Mesh WiFi network at any time - just plug in another Deco router.**
