Information:

The Extralink Smart Life USB-A to Micro-USB cable provides stable charging and data transfer between devices equipped with a Micro-USB port, such as older smartphones, tablets or audio equipment. The durable nylon braid increases resistance to twisting and mechanical damage, while also giving it an attractive appearance. Support for up to 15W (5V, 2.4A/3A) enables fast and efficient charging. The 100 cm length ensures convenient use and flexible connection.

Product features

Cable length	1 m
Maximum charging power	15 W
Connector 2	micro_usb
Connector 1	USB A

Full product description

Robust connection for a variety of devices

The Extralink Smart Life **USB Type-A to Micro-USB** cable provides a stable connection between devices equipped with USB-A (traditional type) and Micro-USB ports. It is ideal for charging and data transfer between older devices such as smartphones, tablets, and audio devices.

Durable nylon braided construction

The cable is made of **nylon braid**, which provides exceptional **durability and resistance to twisting and mechanical damage**. This makes it not only durable, but also aesthetically pleasing.

Fast and efficient charging

It supports a maximum charging power of up to **15W**, at **5V** and **2.4A/3A current**. This provides fast charging for **Micro-USB-compatible** devices, allowing you to quickly restore full battery power.

Practical length of 100 cm

The cable has an optimal length that provides **comfort and flexibility** when charging from different sources without having to be close to an outlet.
